MANOSCRITTI

FONDO JOPPI

Manoscritto n. J_MSS_0047

I manoscritti che compongono compongono il fondo, assieme alle migliaia di testi a stampa - compresi rari incunaboli e cinquecentine - il Fondo Joppi, sono quasi esclusivamente di interesse friulano. La raccolta si è formata nell'arco di una sessantina di anni grazie alle ricerche di Vincenzo ed Antonio Joppi.

47. - *Commentarius in Avicenae*, adespota ed anepigrafo: testo latino con note marginali. Opera di valore bibliografico-storico.

Comincia: « Jam locuti sumus | in libro primo de apostematibus | Cum « istam partem ex-libris Avicenae | intendamus exponere gratia operis « chyrurgiae | ideo oportet aliqua nobis premittere antequam ad | Medi-« cinam accedamus. »

Finisce: « . . . . nos pervenire fecit: — **amen** | Expletum fuit hoc opus « sub anno Domini millesimo ccc septua | gessimotercio Indictione sexta die « XVI.ª mensis septembris | per me ·J· (Johanne) de Foroiuly — **amen.** »

In fine avvi la nota seguente di mano dello storico Liruti: « Codex « hic scriptus anno MCCCLXXIII manu ·J· de Forojulio, videtur credendus « Commentarius in Avicenae opera, quae curationem extrinsecam mor-« borum, et eam medicae artis partem, quae Chirurgia appellatur, res-« piciunt; hic enim agitur de apostematibus extrinsecis et intrinsecis, « et alijs tumoribus, quae ad manualem curationem pertinent; inde de « vulneribus, quae ab extrinseco proveniunt. 47

« Index apostematum, de quibus hic, ab intrinseca causa provenien-« tium. | De Flegmone et ejus cura — Erisipilla — Formica — Igne per-« sico, et pruna — Inflationibus, et vesicis — Essera — Cancrena — An-« trace, et carbunculis — Eexituris intrinsecis, et extrinsecis — Adememul « — Moron — De Vulneribus, eorum accidentibus, et cura etc. | Tracta-« tus II. de apostematibus frigidis. »

Un vol. in-4.° (mm. 220 × 295) di fogli membranacei 88 di cui alcuni tarlati. Scrittura del sec. XIV disposta in due colonne simmetriche; apografo di Johanne (?) de Forojulio in data 26 Sett. 1373. Le lettere capitali sono rimaste in bianco.

cum [illegible] error quo infestat homines. Tertio requiritur
ut non sit timidus, unde audax et fortis. Tamen secun-
da sunt respectu. Quarta dicit melius cum distinctione
quia [illegible] in rebus notoriis medicus debet esse superbus
et constans in operando sicut in medendo apostema secundum
philosophum quod est sub inguine in venis et arterie
inguinis sicut recitat Albucasis de quodam qui secuit
apostema scrophulosum in collo inferius et mortua
fuit infirma in manibus eius et ideo est intelligendum
de sublimibus talibus notoriis. Sed debet esse audax et
non timidus ubi convenit operari sicut in locis
non nocivis non timorosis. Et ideo bene dicit de hoc
Albucasis. Et est iam expertum in loco suo libri magistri
quod opus in quo est error et timor quam necesse est
ut vos caveatis et dimittatis ipsum ut non in-
veniant stolidi viam ad loquendum et dehonest-
andum vos. Ergo accipite animas vestras cum sollici-
tudine et peritie. Infirmos cum facilitate et firmi-
tudine [illegible] et tamen viam meliorem producite qua
deo ad salutem et successionem laudabilem.
Et propter hoc dicebat ille sanctulus pulcrum verbum
non est medicus et misericordem ne infirmi motus
clamore minimus quod oportet mandat vel secet, si
omnia audacter et sollicite faciat, ac si nullis [illegible]
gentibus moveretur. Quarto requiritur ut [illegible]
manus leves et expeditas quia tunc opus et tactus
fit facilior et cum mora clamor et dolor maior.
Curandus est ut dicit Galenus in [illegible] sanitatis. Tamen
dolorem magnum potest quam mora aliud est causa
apertis sicut dolor est et propter hoc dicit Avicenna in 3a fen
de apostematibus [illegible] cum [illegible] omnis [illegible] ideo
[illegible] sunt necessarie [illegible] ut fiat
[illegible]. Et si tactus sunt [illegible] requiritur ut apta instrumenta
cum facilitate. Quinto requiritur ut [illegible] manifestum quia secundum apparere
sunt apud eum et hoc est manifestum quia [illegible]
insitis non potest fieri opus manuale. Sicut cum ca-
[illegible] male medentibus non possumus
[illegible] cum [illegible] expedita sunt [illegible]
[illegible] ob [illegible]. Tertius quo [illegible]
erat [illegible] in principio huius libri [illegible] melius
ad litteram accedamus ut autem appareat melius
distinctio, et ideo ipsius [illegible] dividendus est totus
distinctio et dividitur totus iste liber
[illegible] liber [illegible] Avicenne. Et dividitur [illegible] non sunt [illegible]
in quo Avicenna agit de egritudinibus quae non sunt [illegible]
[illegible] toti corpori in [illegible] fen.
[illegible] et speciali [illegible]
in prima agit de febribus in generali et [illegible]
et [illegible]. In secunda determinat de crisi et diebus cre-
ticis. In 3a de apostematibus. In 4a agit de solutione con-
tinuitatis. In 5a de dislocatione. In 6a de venenis et remediis
quarta de dislocatione in 6a [illegible] turpitudinis
[illegible]. In septima de decoratione turpitudinis
corporis. Obmissa autem [illegible] fen quae non spectat ad
opus cyrurgicum [illegible] intendit exponere 2am fen
quae est de apostematibus et [illegible] ad expo-
nendum de quarta [illegible] ad aliqua capitula in quibus est
difficultas. Continuentur [illegible]. Postquam Avicenna
sufficienter determinavit de febribus et cura ipsarum et
hoc in prima fen et de crisi et diebus creticis et

Hic 2a fen. modo in 3a [illegible] tractat. In primo trac-
tatu determinat de apostematibus calidis et causis ipsorum. In 2o
determinat de apostematibus frigidis et causis ipsorum in 3o de lepra et
cura eius. Quia autem fecit de lepra tractatum diversum
est quia lepra licet conveniat cum apostematibus in hoc quod lepra
[illegible] ultimo toti corpori tamen quia lepra habet aliud
modum [illegible] quam alia apostemata eo quod ipsa totum corpus
comprehendit propter hoc distinctum tractatum fecit. Quia
autem [illegible] in 2a quia primo continuat cum [illegible] ad ea
quae dicta sunt de apostematibus in libro primo 2o prosequitur de
apostematibus secundum quod spectat ad hunc librum 2a. Dico ergo quod Avicenna
prima in 2a [illegible] primo post quam fuit locutus
de apostematibus in libro primo 2o ostendit quo loquitur in hoc libro
2o: **In hac autem loco.** [illegible] ad litteram [illegible]
[illegible] quae sunt [illegible] intelligenda [illegible] litteram quae
sunt necessaria. Unde est [illegible] continuatione 2m est de di-
finitione apostematis. Scilicet quid sit apostema 3m est de causis
apostematis 4m est de [illegible] apostematis. Quae primo
[illegible] videtur quod Avicenna male processit cum
[illegible] post determinationem [illegible] determinavit de apostematibus
[illegible] naturalibus et artificialibus
[illegible] simplicia precedunt composita. Sed solutio continuitatis morbus
simplex est et apostema est morbus compositus ut dicit
Avicenna primo canonis fen 2a [illegible] tractatus de solutione continuitatis debet
precedere tractatum de apostematibus. [illegible] in libro de [illegible]
[illegible] capitulum de solutione continuitatis [illegible] apostematum [illegible]
[illegible] male processisse. Dicendum quod loquitur de apostematibus
et solutione continuitatis [illegible] uno modo in via speculationis
et theorice, alio modo in via curationis et practice. Si loquamur
primo dico quod [illegible] dubio determinatio solutionis continuitatis precedere debet
determinationem apostematum quia naturaliter simplex precedit
compositum et precedit totum. Modo solutio continuitatis est morbus
simplex et apostema est morbus compositus et ideo quod [illegible]
solutio continuitatis precedit apostema et ideo quia Avicenna in 2a fen
libri primi [illegible] in via speculationis et theorice ideo Avicenna in
2a fen posuit capitulum de solutione continuitatis [illegible] de apostematibus.
Sed in via practice et curationis non est [illegible]
[illegible] qui est in via curationis melior. Nunc autem
Avicenna [illegible] tractatum apostematum [illegible]
[illegible] solutione continuitatis. Primo quia ipse [illegible] determinat de se
et ad se multos [illegible] apostema per viam [illegible]
et quia apostema multa [illegible] se ideo [illegible]
post se determinat de curatione apostematum. Alia causa potest
esse quia licet solutio continuitatis sit causa una integritatis apostematis
[illegible] ex tribus morbis et tamen apostema
est [illegible] cum solutione continuitatis quia solutio continuitatis est post apostema
[illegible] integritatis [illegible] est [illegible]
[illegible] solutionis continuitatis [illegible] ad sensum
[illegible] ulcus et ideo dicit Avicenna [illegible] fen 2a
[illegible] ulcerum [illegible] aut apostema quod rumpitur aut
[illegible] bothor quod se [illegible] et illa est [illegible]
[illegible] apostematis aut plaga quae [illegible] et ideo quia
ad apostema ut plurimum [illegible] solutio continuitatis [illegible]
[illegible] Avicenna. Saltem solutio continuitatis quae est ulcus ideo
posuit tractatum de solutione continuitatis post tractatum
de apostematibus in via curationis. [illegible]

sequitur ex predictis, quia Avicenna et alii auctores loquendo de
cura apostematum posuerunt circa ipsorum usque ad apostemata post-
modum quia apostemata sunt rupta dependet curatio corporis
ex curatione ulceris. et ideo Avicenna non docet curam apostematum
que sunt apta in tractatu apostematum sed in tractatu
ulcerum et solutionis continuitatis. et ponens curam apostematum precedit cu-
ram ad hoc solutionis continuitatis et illa sequitur ideo in via curativa pre-
misit tractatum apostematum tractatui solutionis continuitatis et propter hoc
Avicenna etiam primo canonis fen 4a quia ibi loquitur practice
prius determinat de curis apostematum quam solutionis continuitatis. Tale
.F. ue. secundo ad tertium ad primum et tertium patet solo per ea que dicta
sunt. quia arguunt in via theorice et speculative
et hoc concessum est. Ad secundum argumentum quia dicit G. primo
ponit circa solutionem continuitatis est dicendum quod G. respexit
ad rationem simplicis et compositi et quia solutio continuitatis est simplex
et apostema est morbus compositus ideo prius G. declarat
de solutione continuitatis quam de apostemate. et non solum determinat prius de
solutione continuitatis quam de apostemate sed etiam prius quam de mala complexione
et ideo hoc potuit esse quia solutio continuitatis est morbus communior
quam mala complexio. Ad aliud autem procedit minus recte ubi post
dicit quod G. ... determinat prius de solutione continuitatis quam de apostemate
quia in 2o libro G. processit disputando contra illos qui
dicebant sufficere in curatione solutionis continuitatis considerationem
communem, ut cum morbus sit quod preter naturam debet abicia-
tur et non dicebant requiri considerationes speciales. et
ideo incipit in 3a particula ab illo morbo qui indiget
in sua curatione magis pluribus considerationibus sicut a solutione continuitatis quia
indiget multis considerationibus specialibus tam ratione sui quam ratione
compositionis cum aliis morbis cum ratione diversitatis in
brevis cum ratione diversitatis compositionis totius corporis et in
Descriptio apostematis brevi. Ad 2m dico. Sed de diffinitione apostematis quod
de apostemate potest dari multiplex descriptio. una
est que solet dari communiter apostema est tumor vel inflatio
.Sol. membri preter naturam. Contra istam diffinitionem potest obiici
quia in apostemate est multiplex peccatum secundum Avicennam primo
canonis fen 2a. Sed peccatum in forma in compositione et in
quantitate. sed tumor est peccatum in compositione quia est peccatum
in quantitate. peccatum autem in compositione quando tunc cum in
... sit triplex morbus non solum apostema erit tumor preter
naturam sed etiam mala complexio et solutio continuitatis non est ergo
illa sufficiens descriptio. Item si caro addit
... sicut fit multum in vulneribus que superex-
crescit caro vel sicut fit contra naturam ...
autem si superadditur ad fetum post hoc superflu-
tamen ... tunc est in tumore non secundum naturam et tamen
Ro non est apostema. Ad ... dicendum quod ista descriptio est bona
data communiter et potest sustineri ... quod est
intelligendum quod licet in apostemate sit triplex peccatum
scilicet in complexione compositione et unitate. nichilominus tamen dico
quod principalius peccatum quod est ibi est peccatum
in compositione quod apparet primo per Avicennam 2o per G. 3o per
Avicennam quia Avicenna ... de flore distinguit
apostema secundum principium et augmentum et cetera.

peccatum in quantitate est specialiter in complexione quando tunc principium pec-
catum est peccatum in compositione. Verum etiam hoc apparet ratione
Quia si humores fluunt vel colliguntur in aliquo
loco et faciunt solum malam complexionem non dicitur adhuc apostema
Item si sua mala qualitate solvunt continuitatem nisi fiat
in tumore non erit apostema adhuc. Sed si humores fluunt
ad locum aliquem et faciunt tumorem tunc statim faciunt
apostema. Contra quando faciunt tumorem tunc statim faciunt ex-
tensionem et corrosionem. et ad extensionem sequitur
solutio continuitatis et ad corrosionem humorum sequitur mala
complexio. sic ergo tunc formalius in apostemate considerando apostema
secundum se dico quod apostema considerando secundum se quod si concernit
ipsum quantum ad effectum suum quod est ledere. Tunc apostema
ledit plus mala complexione et etiam vel si concernit ipsum
quantum ad causam eius. Quia considerando ipsum secundum se principale
peccatum est ibi peccatum in quantitate magis quam sint
in alia duo peccata et ideo convenienter potest dici quod apostema
sit tumor preter naturam. et hec diffinitio potest firmari
per Avicennam primo canonis fen 2a qui dicit sic. et emi-
nentia in cute est compositione apostematis et eminentie est sub-
apostemata prava sit apostema sub eminentie magne
et propter hoc videtur Avicenna velle quod apostema sit eminentia
Cum ergo tumor sit eminentia, ergo apostema vel convenienter
dicitur tumor preter naturam. Addit autem tamen quod est tumor
dicitur tumor preter naturam. Quia tumor
preter naturam quod non omnis tumor facit apostema. Quia tumor
membri alicuius quod esset ex natura sicut pro aliquo
membro alio quod esset ex natura sicut pro alio
esse tumidus ex natura complexionis quam alia membra et hoc potest
vel ex natura membri vel ex generatione secundum quod natura potest
impedimenta in suis operibus talis tumor non est apostema
quia est ex natura non quod sit ex intentione nature sed ex natura
est quod est ex principiis generationis naturalibus sicut etiam
talia monstra dicuntur naturalia. Et mittit in quo dicit apostema
est tumor secundum tumor qui est ex humoribus unio tamen quod sit
tumor ex carne addita sicut fit in superexcrescentia
tumor ex carne addita sicut fit in ulceribus et quia apostema est tumor qui causatur
ex hoc quod aliquid humor colligitur in membro de novo vel
sed paulatim vel quia fluit ad ipsum ex alio membro
et tales humores educat tumorem et malam complexionem et solutionem continuitatis
sic ergo bene tamen dicitur apostema est tumor membri preter naturam
et per ea que dicta sunt patet solo ad dicta. Videtur etiam a d primo apostematis G.
alia descriptio apostematis contra G. in ... particula de ingenio
sanitatis dicit quod apostema est morbus mutans membrum
de naturali qualitate ad id quod est preter naturam.
.Bo Sed contra hanc diffinitionem quia isto modo omnis
mala complexio esset apostema ut arguebat. cum mutet membrum
a sua naturali qualitate. Ad hoc potest responderi quod G.
F per qualitatem membri non intelligit complexionem solum, quia
isto modo mala complexio esset apostema ut arguebat sed intelligit
per qualitatem triplicem formam scilicet complexionem, compositionem
et unitatem. Tamen applicat hic qualitatem tantum quo
ad 2am et 3am istius morbus mutat membrum
a sua naturali complexione et non a naturali compositione et unitate
et peccatum in compositione mutat membrum a sua natura.

quod dicat patet. Sed dubitabitur . . . quod dicit . . . hic. quia ipse dicit in primo canonis fen secunda quod nullum apostema . . . sanguis malus cum materia est humor malus et non laudabilis. Dicunt quidam quod iste sanguis . . . laudabilis . . . ad sanguinem adhuc . . . malignum et venenosum. Ego autem aliter . . . Dico quia dicunt quidam quod . . . de sanguine laudabili in qualitate sed non in quantitate . . . dicunt ipsi quod ille sanguis . . . mala . . . in membro . . . qualitates . . . qualitates et ad . . . sicut dicunt. Nam ipse . . . in . . . quantitate moderate calefacit . . . aut . . . illius non . . . naturalis. quia potest fieri apostema ex sanguine laudabili in quantitate et qualitate et hoc dico . . . ad . . . quia . . . est . . . temperato in qualitate et quantitate . . . et ex . . . laudabilis . . . fit in apostemate . . . sanguis . . . laudabilis in quantitate et qualitate et . . . sanguis quo ad nutrimentum . . . colligatur in apostemate. potest esse laudabilis in quantitate et isto modo et qualitate licet ut plurimum peccet in quantitate . . . intelligit hic . . . quod apostema fit a sanguine laudabili saltem in qualitate licet peccet in quantitate et quod . . . fit a sanguine laudabili quia potest esse . . . fit . . . factus in apostemate vel collectus peccat in qualitate et quantitate . . . apostema quo ad . . . et . . . Sic dico quod omne apostema fit a sanguine illaudabili . . . in apostemate sanguis . . . et ex illa . . . dato quod prius in se esset bone qualitatis fit male qualitatis et isto modo intelligit . . . in primo cum dicit quod nullum apostema . . . sanguine malo cum materia. Deinde cum dicit et sanguis laudabilis **aut est grossus aut subtilis.** Sed . . . tu dicis . . . quod dicat . . . quia sanguis laudabilis non est grossus neque subtilis immo est equalis cum . . . et . . . quia sanguis non naturalis est ille vel qui est grossus vel subtilis . . . primo canonis fen prima . . . de humoribus. Dico quod sanguis laudabilis non est grossus neque subtilis sed equalis est. Alio modo potest . . . accipi ut dicatur sanguis laudabilis qui non . . . a sua naturali qualitate sed aliquantulum . . . a sua substantia in grossitudine vel subtilitate . . . licet apostema possit fieri a sanguine laudabili primo modo . . . quo ad . . . et . . . apostema

ut dictum fuit prius et tamen ut plurimum peccat in apostemate sa-
vel quo ad grossitudinem vel quo ad subtilitatem
in apostemate ad omnem complementum apostematis et hoc per
permixtionem aliorum humorum cum ipso. ut palam -
orem quod accidit ipsi, vel quia ita oritur. ut plurimum
ideo dixit quod sanguis laudabilis modo ut dictum est //
Et fiunt ex apostemate a sanguine est flegmon sive
et ipse. et flegmon accipit carnem et cutem simul, et hoc est
ratione grossitiei materie et ideo plus profundat materia
in flegmone cum apostemate sanguineo quod in apostemate colerico
et ideo dicit G. in primo pri. de ingenio sa. Et sicut
flegmon fit in carne preter cutis amplexionem licet celerla
sic fit in cute preter carnis amplexionem. Et intellexit
hic autem quod loquitur de apostematibus que fiunt in exteriori-
bus partibus corporis. quia de interioribus locutus est in 3o. et
ideo dicit autem quod accipit carnem et cutem simul. et hoc
verum de apostematibus exterioribus. de quibus loquitur. quia de interi-
oribus membris non est ipse cutis et est cum pulsatione
quia ratione caliditatis cogit arteriam elevari et erectari
et ratione autem compressionis quam inducit in membro ratione
et ratione autem compressionis quam inducit in membro ratione
per fundationis humoris coartatur arteria et resistit
eius in elevatione et ideo ratione illius coartationis
et ratione illius caliditatis ut erectetur magis movet
arteriam, et fortius pulsat, et sentitur pulsatio
in membro materiati. et de subtili sanguine sufficit
flegmon quod accipit cutem sola magis depellitur ad su-
perficiem et minus profundatur in carnem propter subtili-
tatem materie. Unde non intelligas quod accipiat cutem
solam ita quod non preter carnes. sed dicit accipere cutem
sola. sive primo. et generatur complective preter carnes
et est sprima i. erisipila et de erisipila sprima quia est in ea
et est sprima i. erisipila et de erisipila sprima quia est in ea
putatio ad modum putationis spine. Et tu dices quid
facit hic mentionem de erisipila cum sit apostema colericum. Dico
quod autem intelligit quod illud flegmon est erisipila quia declinat
ad naturam erisipile sed non omnis erisipila vera. quia tale fit a colera
pura, vel a sanguine qui iam acquisivit naturam
colere per adustionem. Verum cum sanguis adustus
est subtile generatur in colera. et sprissium tamen
stiam. Et tale flegmon dicitur erisipila quia sillatur erisipila in
accidentibus et hoc ratione sanguinis qui proportionatur colere
in subtilitate et propter hoc autem facit hic mentionem de erisipila
primo intellige quod tale erisipila non maligna ut plurimum fit ex
tali sanguine et raro fit ex colera pura bona. quia ut
dictum fuit supra. Raro fit apostema ex colera pura
radicali. Et ut plurimum erisipila non maligna fit ex sanguine
non laudabili proportionato ad coleram, et ideo quod autem
loquitur de apostemate colerico non facit mentionem de tali erisipila
non maligna. quia talis generatur ex parte de colera pura. Unde
est quod quod fit ex ea tunc est vera erisipila et plurimum fit ex
tali sanguine et ideo facit autem hic mentionem de tali erisipila
et non quando loquitur de apostemate colerico propter eandem causam. et non
est cum pulsatione intellige sicut prius. quia materia non est hic
ita profunda. et ideo non coartatur ita arteriam sicut
in precedenti. Deinde cum dicit. **At vero fiunt a
sanguine grosso.** ponit de apostemate quod fit a
sanguine illaudabili. Dicit quod sunt species sive exituras
malarum et est ratione nimie malicie corrodentis et
adurentis ut statim patebit. Et intellige quod exitura accidit
duobus modis uno modo large pro omni apostemate. Alio modo proprie
stricto quod pervenit ad collectionem et primo modo accipi-
tur in expositione exiturarum malarum i. apostematum malorum
quod dicitur sit inter apostema et exituram et de ubi esset. Dicitur
in 1o de exituris. Nam si dicis sanguis si
grossi mali fiat vehementior in malitia et pervenit citius
sicut pus quia ex tali sanguine grosso mala fiet
flegmon quod assimilatur ericle in accidentibus. sed adusti
one. et calefactione. licet non assimiletur ei propter sub-
tilitatem materie et accidit adustio et crusta. sed quando
materia fuerit calidior et adustior. Unde sic ab ea fit
combustio primo deinde relinquitur escara vel crusta.
nigra ita contingit ex hoc humore propter maliciam eius. et
deterior eo est ignis persicus. quia hoc accidit ex maiori
deterior eo est ignis persicus. quia hoc accidit ex maiori
combustione et caliditate. Unde sicut variatur cali-
ditas et adustio in humore ita variatur accidentia
dictas et adustio in humore ita variantur accidentia
et denominationes. et dicitur ignis persicus ad si-
militudinem ignis inflammantis, et faciens bullas
et hoc fiat propter maiorem maliciam sanguinis. et in
et hoc fiat propter maiorem maliciam sanguinis. et in
esse de igne persico eodem modo quo dictum est de
erisipila si sanguis per inductionem accidentia ignis persici
similia propter maliciam eius, Unde facit flegmon quod assi-
milatur igni persico in accidentibus. et a subtili sanguine
malo accidit flegmon quod declinat ad erisipilam quod assimilatur
ericle et tendit ad naturam ericle male et ad maliciam
et fraudulentiam sed generis. sanguis propter adustionem
convertitur ad coleram. et intellige quod illud flegmon tendit
magis ad naturam ericle quod primum. quia in primo sanguis
tendit magis ad naturam colere eo quod assimilatur ei. et
in subtilitate sed et in genere. Et autem fuit sub
tilior. sed sanguis erit erisipila flegmodes. Dicit hic proportionatur ma-
gna proportionem quam habet sanguis ad coleram cum
subtilitate et caliditate fiet denominatio plus ab erisipila
sicut a predominante, quia tunc habebunt sola accidentia
apostematis colerici quam sanguinei. et ideo fiet denominatio
apostematis colerici quam sanguinei. et ideo fiet denominatio
ab apostemate colerico. et quando fuit eius malicia maior
sive huius sanguis subtilis. quia quando iam transivit
in naturam colere. malicia maior i. maior adustio
erit erisipila habens inflammationem et vesicationem et obu
stionem et crustam. et hoc propterea quia sanguis est ita
talis. et adurere quod facit vesicam et crustam
sicut ignis. et intellige quod dicta est inter vesicationes
et crustam et fraudes. quia fuit a sanguine grosso
malo. quia iste magis declinat ad atrimentatem
eo quod materia huius magis sillatur colere ut dicam
fuit prius. Ille vero magis declinat ad nigredinem
omnem cum rubore. quia materia non ita assimilatur
colere. Ultimo autem intellige quod omnia apostemata in
quibusdam sunt sanguinea quia materia radicalis fuit
sanguis licet in quibusdam habeat proportionem
et transeat in naturam colere, ut dictum est //
Deinde cum dicit **Colericum autem est etc.**

Hic dicit quod cum sanguis est subtilis fiat duas proportiones

Iam sciuisti flegmonem. — De flegmone

[F]In prima parte huius capituli auctor determinat de apostematibus calidis ubi ponendo generalem diffinitionem apostematum calidorum. In parte 2a prosequitur de eis specialiter determinando de qualibet specie apostematis calidi et rheumatico et sicco. In prosequendo de eis specialiter primo determinat de flegmone quod est apostema calidum sanguineum. in prosequendo autem de flegmone sic procedit quia determinat de flegmone rheumatico et quantum ad suam causam et quantum ad signa et quantum ad quedam alia. 2o determinat de apostemate sicco ponendo curam ipsius. 3a ibi. **Et oportet ut in potu tribuatur.** Circa primum autem ista facit. Nam primo ponit signa flegmonis. 2o distinguit nomen flegmonis quod erat equiuocum. ut appareat in qua significatione intendit de ipso. 3o ostendit cum quibus associatur flegmon. 4o inquirit causas eius. 5o inquirit tempora flegmonis. 6o ponit signa sue terminationis et sui processus. 2a ibi. **Et scias quod nomen flegmonis.** 3a ibi. **Et par quidem contingit.** 4a ibi. **Et habet causas.** 5a ibi. **Et augmentum quidem.** 6a ibi. **Et tu quidem scis.** Dicit primo iam sciuisti de flegmone superius quantum ad eius essentiam et quantum ad eius causas diuersas. ex quibus humoribus generatur. quia generatur ex sanguine et hoc in primo canonis fen 2a. capitulo de egritudinibus compositis. et etiam hoc sciuisti in primo canonis. ut in parte apparuit / et signa eius quodammodo sciuisti ex predictis et hoc in apparuit. sed hic ponuntur completius signa eius et ideo sequitur. **Et signa eius sunt** sensuum ex parte calidi dilatationem et inflationem. **Et** signa eius in diebus intendentis et idem de ... ne autem videatur idem repetere. quia caliditas sensuum quantum ad tactum ... inflatio autem quantum ad sensum visus uel potest ex parte ex caliditate in loco ubi est apostema. et ex inflatione toto corpore per distemperantiam febrilem. Nam raro contingit flegmonem non sequatur febris maxime si sit magnum et in loco arterioso propter supercalefactionem cordis. Alia est in loco arterioso propter ... et additione quantitatis ... in membro apostemato et additione quantitatis et ruboris. quia fit in tumore propter multitudinem materie et grossitiem spiritus. et in hoc differt ab erisipila quia materia erisipile ... dispersa in superficie propter subtilitatem spiritus / sed materia flegmonis colligitur plus in uno loco / et inducit ruborem maiorem / et extensionem. propter repletionem partis et grossitiem materie. Et est in tensio cum quadam duritie et hoc etiam differt ab erisipila et impulsione et pulsatione in hoc etiam differt ab erisipila quia non tangit quantum ad tactum. quia impellit tangentem. quia non reddit tactum propter repletionem et tensionem hoc est in pulsatione intelligendum autem quantum ad arterias. quia pulsant propter necessitatem euentationis et exhalationis materie. ut dictum fuit supra et maxime est in pulsatione cum est propinqua arterie. et est in membro cum aduenerit duritie quibus et hoc est in membro neruoso et arterioso / quia quanto membrum est magis neruosum et magis arteriosum tanto est in maior dolor ratione neruorum et maior calefactio ratione arteriarum. et ideo fit maior pulsatio cum ratione caliditatis ut eueniat cum ratione materie noceuntis que facit dolorem ut expellatur et hoc est quia fodit. **Non plus quam sensibilitas secundum pulsationem.** quia vult dicere quod pulsatio et dolor fiunt secundum sensibilitatem membri. quia in membro neruoso et arterioso est maior pulsatio quam in

alio ratione loci sunt sciuisti de dispositione ... in primo libro de causis uniuersalium dolorum. Et quanto plus fuerit arterie maiores erit pulsatio et et impulsio ... quia propter magnitudinem arteriarum est ibi multitudo spiritus ... et ualde inflatiue propter calidum apostema. et ideo maior est ibi pulsatio propter maiorem calefactionem. et dolor est etiam uehementior ratione maioris nocumenti quod inducat / ... etiam resolutio spiritus / et collectio eius fit uelocior ratione maioris caliditatis. quia quanto materia est magis calida tanto citius mouetur ad resolutionem uel collectionem sed fortiora accidentia inducat quam quando est minus calida. **Et cum in membro fuit flegmon** qualiscumque sit siue sit magnum apostema siue sit paruum / et hoc prout sensibilitas quia dolor contingit sensibilitati rei nocentis. unde dicitur quod dolor est mali sensus. quia est sensatio rei nocentis et male. et ideo quanto apostema est in membro sensibiliori tanto est in maior dolore quia magis sentitur. ymo contingit multis quod materia pauca maiorem inferet dolorem quam multa. et hoc est ratione sensibilitatis membri uel loci. et comitatur ... flegmonem ut appareant uene illius membri plus quam erant ante et hoc est propter repletionem illius partis et extensionem. quia materia in ipso profundat et replet uenas. et ratione multitudinis et ratione grossitiei materie. et in hoc etiam prout differt flegmon ab erisipila quia in erisipila est minor pulsatio quam in flegmone quia materia in ipsa minus replet uenas et minus coartatur licet sit plus calida et propter hoc in flegmone est maior dolor ratione maioris extensionis quam est in erisipila est maior punctio ratione acutioris materie. **Et** istam partem dubitatur. quia uidetur quod auctor sit superfluus ponendo in signa quia cum loquatur de apostematibus occultis ut dictum est supra in prefato capitulo. Et cum apostemata occulta ... pateant sensui ut dicit auctor in 4o. fen. 2a. capitulo de signis apostematum uidetur quod non fuit necessarium signa ponere. **Dicendum** quod auctor non fuit superfluus in ponendo signa ymo fuit necessarium ipsa ponere. et tu dicas quod auctor dicit. quod apostemata exteriora appareat per se sensui. dicendum quod uerum est quod apostemata exteriora patent per se sensui in quantum sunt apostemata et sic non sunt necessaria alia signa in sensus. Sed utrum tale sit ex sanguine aut colera / hoc non patet per se sensui. ymo discernitur per ipsa signa et hoc est quod dicit auctor hic. quando docet distinguere flegmonem ab erisipila per ipsa signa. Unde licet pateat sensui quod flegmon sit apostema sed quod sit flegmon non patet sensui quia apostema est flegmon uel erisipila in quantum dependet ex tali causa quam non cognoscitur per ipsa signa. et ideo dicit auctor ... indigent signis significantibus ... et ... **Et scias quod nomen flegmonis.** hic auctor distinguit nomen flegmonis quod erat equiuocum. ut appareat quod non loquitur de ipso in omni sua significatione accepto dicit 2a ibi. **Et non caret infl ationem.** hic ostendit quod maxime apostemate sanguineo competit hoc nomen flegmon. quia flegmon dicitur quasi flamma. ... apparet in flegmone flamma propter ... sanguinis et ... incarcerationem. Unde in flegmone est inflatio ratione materie calide. licet quantum est ex hoc sit maior inflatio in erisipila. Est etiam inflatio ratione inflationis ... coartationis sanguinis. et propter hoc est etiam maior pulsatio in flegmone quam in erisipila quia sanguis coartatur in arteria plus. Unde non potest ita euentari sicut in erisipila / et ideo augetur et fortificatur

[illegible] non [illegible] antecedentibus [illegible] antecedentes [illegible] sunt [illegible] causa [illegible] dicit [illegible] primo [illegible] corporales [illegible] humora[les] [illegible] non [illegible] primo [illegible] medicina [illegible] corporales [illegible] non [illegible] [illegible] non [illegible] corpore [illegible] antecedentes [illegible] corporales [illegible] [illegible] non tenet [illegible] primo [illegible] antecedentes [illegible] dubitationes [illegible] circa [illegible] non [illegible] locum [illegible] ad [illegible] replexione. Replexio [illegible] apostema [illegible] potest [illegible] debilitate [illegible] expellere [illegible] membra [illegible] debilitate [illegible] non potentes expellere [illegible] et [illegible] dato [illegible] non sit replexio [illegible] debilitas [illegible] potest esse [illegible] apostema

Si tu dicis quod potest [illegible] non [illegible] humores [illegible] Non [illegible] posse fieri [illegible] superfluat [illegible] Ad hoc possumus dicere duobus modis uno modo [illegible] dicat [illegible] non sit [illegible] corpore replexio [illegible] non [illegible] sit aliqua [illegible] potest [illegible] dato [illegible]

non sit aliqua replexio in [illegible] potest esse debile [illegible] apostema [illegible] sit aliquod [illegible] aliquod membrum debile [illegible] et alia membra [illegible] fortia [illegible] debilitate non potest nutrimentum sibi [illegible] sibi assimilare [illegible] superfluum [illegible] expellere [illegible] superfluitates [illegible] non [illegible] superfluitatem [illegible] ad eam transmittatur expellere [illegible] apostema [illegible] membra [illegible] sit debile [illegible] superfluitates [illegible] alia [illegible] superfluitates ad illud [illegible] expellunt membra alia sicut superfluitates [illegible] membrum debile [illegible] superfluitates [illegible] debilitatem [illegible] potest [illegible] esse [illegible] apostema [illegible] in multis qui habent aliqua membra debilia vel [illegible] toto tempore [illegible] et adunatur [illegible] humorem [illegible] non repletio. [illegible] non [illegible] antecedentes [illegible] ut plurimum contingit. [illegible] antecedentes [illegible] dispositionem [illegible] repletio [illegible] humoribus [illegible] et [illegible] sunt [illegible] debilitas [illegible] duobus modis. [illegible] debilitas [illegible] membro [illegible] et morbo. [illegible] debile [illegible] et [illegible] duobus modis [illegible] membra [illegible] ut [illegible] superfluitates [illegible] membrorum [illegible] superfluitates [illegible] sunt [illegible] membra [illegible] non [illegible] potest [illegible] membrum [illegible] [illegible] **et de eis sunt cause primitive**. [illegible] flos [illegible] dolorem [illegible] calorem [illegible] sanguinem [illegible] dolorem [illegible] sanguis [illegible] **aut ulcera que**. [illegible] membro [illegible] dolorem. et

debilitatem que inducit in membro. et nunc propter dolorem et
debilitatem attrahitur humor ad illud membrum et sic fit apostema.
Sed fleubotomia magis. Quia humor qui currit ad locum debilem
et dolorem est magis sanguis et spiritus. Sed hic est dubium
quia primo ponit debilitatem membri inter causas antecedentes
et in precedenti parte posuit inter causas conjunctas. Item ponit
etiam dolorem inter causas primitivas. et supra dicebat
fuit quod est causa antecedens cum mala quod fit illud quod
facit dolorem vel sanguinem. Dicendum ad primum quod debili-
tas sive in sic est causa antecedens. quia causa remota. sed
ratione actionis illius quod hic ponit. quia est illud sunt
illa ulcera posuit eam ante cum primitivam. quia eius
primitiva est. Sed prius autem ponit tamen antecedentem
considerando tamen secundum se vel etiam per accidens ad tamen sequela
que est causa antecedens. hic autem dicit eam tamen primitivam
per respectum ad causam primitivam. Sic dicendo quod dolor
est causa antecedens ratione cause sue antecedentis. sed ratione eius
proprie dicit secundum ipsum autem esse tamen primitivam. Quia
autem dolor fit cum apostemate apparet. Et fortasse de-
clinat ad ipsum. sed forte id fuit ulcera. materie tristes
retinentur in vijs que sunt debiliores eis sicut
accidit in ulceribus et fistulis. et apostemata in locis vijs
sicut in inguine et subascellis. ex ulceribus pedum
vel manuum. Et sic totum est cum eam primitiva refe-
rendo sed ad causam primo moventem. Et hic etiam est
notandum quod causa primitiva non potest esse cum apostemate
sine antecedente. Sed est humor. vel quia sine esse cum apostemate
sine causa antecedente que est repletio vel debilitas membri. Sed
non potest esse causa apostematis sine humore. quare de
necessitate quod cum apostemate antecedens sit humor sive ille
humor sit laudabilis sive illaudabilis. Sed cum causa
tamen potest esse cum apostemate sine primitiva. sed loquendo de
causa primitiva que obviat antecedenti in membro sic est
in casu vel contusio et sic non generant repletionem humo-
ralem et forte membri impellentem et debilitatem membri
recipientis. quare omnes sunt causae antecedentes ponit esse cum
apostemate sicut etiam primitiva obviante corpori pleno in
generatione talis apostematis. Sed tu dices autem in presenti
capitulo diversificat curam fleubotomie quod est causa antecedens et
que est causa primitiva. Ergo ut dicas non potest
fieri apostema sine causa antecedente nunc ergo non diversificat
curam. Vnde quod autem mittit de causa antecedente que est
humorum repletio in corpore sive bonorum sive malorum
vel de causa antecedente que est causa finalis que est in
membris ratione cuius attrahunt humores ad locum et
faciunt apostema. Et si est illa bene potest fieri apostema. quia potest
fieri a causa primitiva que facit apostema non solum per attra-
ctionem humorum sed quia expellit humores existentes in membro
suo in loco. Sed ille quod dicitur causa antecedens sit humor
sive sit superfluus sive non. et sic non potest fieri.
Et per istam tamen autem non diversificat curam
infectionis. Sed per illam que est ex repletione corporis
Et aliter curat apostema quod est a causa antecedente. et aliter
quod est a causa primitiva. Et tunc etiam curat aliter
quando primitiva obviat corpori mundo. et quando corpori re-
plete in quo est causa antecedens que est repletio. sicut apparebit in-
fra. Item cadere sit alie dubitationes sed non spectant
ad hunc locum. quia nimis prolongarent sermonem.
Tunc sit illa pars. **Et augmentum quando est.**

In qua distinguit et declarat tempora fleubotomie. secundo ibi
ostendit quod fleubotomia est mala. secundo ibi **Et mala est.** Dicit
primo ergo. Sed quero quare autem non declarat hic principium
fleubotomie. Dico quod ideo non fecit mentionem de ipso. Quia
principium in apostematibus et in fleubotomia sine isto modo est manife-
ste. quia nunc est principium quando incipit tumor. Et ulterius nota
quod tempora distinguuntur in fleubotomia et in quolibet apostemate. Et
cum apostema tendit apostematis. sed apostema tumore et quantitate
et isto distinguuntur sicut distinguit autem. Alio modo
et isto distinguuntur sic distinguit autem. Alio modo
sanguinis per rigorem et mitigationem membri. ut nunc
est principium quando membrum est magis rigidum. Et tunc autem est quando
est perfecta rigiditas. Et sic secundum hoc apostema quod erat in statu
secundum primum modum est in principio secundum istum modum. quod postquam
completum est tumor. nunc congregatur materia et incipit aggregari
sed de aggregata. ut dicit autem in littera. Tertio modo di-
stinguuntur ratione accidentium. ut nunc est principium quando sunt
levia accidentia. In augmento quando fortiora. In statu
quando ultimata. In declinatione quando declinant. Et secundum
hoc apostema quod est in principio vel augmento secundum secundum modum
est in statu secundum istum modum. quia in generatione saniei dolores
et febres ut dicit Y. Modo prima distinctio communis.
secunda. Quia non competit in apostematibus que aggregantur
saniem. Illa in omnibus. Est etiam tertia est generalior. quia
competit. Sed prima distinctio est magis ratione quarta.
Quia illa accidit ab extra. Ista autem ab esse apostematis. Ideo
quia autem loquitur hic de omni fleubotomia communiter et non solum
de eo quod facit sanguis. Etiam prima distinctio
est communior. Tertio ideo autem posuit distinctionem fleubotomie
temporum per tumorem. et non posuit secundam in aliam.
Et mala est. In ista parte autem ostendit quod fleubotomia
est mala. Quia id fleubotomia est malum quando non tendit ad
declinationem in ad resolutionem sed aggregat saniem
fortia. Nam id etiam quod producit ad mortem membri ag-
gregat saniem. sed mala que dicitur ut sunt in fistulis
et ulceribus malis. Reliqua que dicit autem patent. et
quod etiam dicit in precedenti capitulo. **Et tu quidem
scias quod rarificatur.** Secundo processus apostematis. Et in parte dividitur
in tres. primo facit hoc. secundo ponit quoddam signum pronosticum
fleubotomie malignum. tertio ibi **Et scias quod quando manat.**
Prima in tres. primo ponit signum resolutionis. secundo ponit signum
aggregationis. tertio ponit signum quando tendit ad putrefactionem
et corruptionem membri. secunda ibi **Et scias illud quod ag-
gregat.** tertia ibi **Et scias illud quod putrefit.** Dicit
primo. et tu quidem scias illud quod rarificatur et resolvitur
quando pulsatio incipit minui. Sed est in
tendendo sive augetur. Et inflatio incipit in sedatio-
nem et minuitur. Sed dicit autem videtur esse pulsa-
tio primo per rationem posuit. quia signum resolutionis est quando mi-
nuitur apostema ratione pulsationis et doloris. et
etiam in illa videtur esse contradictoria. Quia inflatio
minuitur de necessitate. Etiam pulsatio minuitur
quia pulsatio est propter desiderium evitationis. Desi-
derium autem evitationis est ratione maioris utilitatis
ergo si inflammatio diminuitur et pulsatio.

quo quidem intendit ut dicat auicenna. Nos possumus modo exponere dictum auicenne cum dicat quoniam pulsatio incipit intensionem. quia sentitur in flegmatione pulsatio ad modum exrigationis et punctionis. quia quando materia resoluitur subtiliatur et ad naturam uaporis proportionatur. et quod est uaporis est causa exrigationis et punctionis ut habetur secundo canone de accidenti morbo. sic tunc istorum non intelligeretur. hic per pulsationem ad modum exrigationis et punctionis et quia talis pulsatio intenditur cum materia rarificatur ut pulsatio est. Vel possumus dicere aliter et melius. quia pulsatio est. Nam propter sui pulsationem arteriarum sunt duo motus. Nam propter ... Vnus motus est ... est motus compositus ex duobus motibus. Vnus motus est ibi dyastoles qui est ad refrigerationem inflationis et iste motus sit dilatando arterias tamen in principio apostematis et in augmento et statu quia istis temporibus est magis calliditas augetur pulsus uocatus dyastolis. Quia dyastoles est ad refrigerandum. In fine autem apostematis minuitur inflamatio et resoluitur et expellitur ad medium. et ideo minuitur pulsus uocatus dyastolis quia non indiget tanta euentatione sed augetur uocatus sistolis qui est ad expellendum superfluitatem quia tunc resoluitur materia ... Quod ergo tunc auicenna intelligit quod augetur pulsatio id est pulsus uocatus motus sistolis sed minuitur uocatus dyastolis. et istud intelligit rasis et alii auctores quod diminutio pulsationis est signum declinationis. et propter hoc ... ad uocem. quia dicit exponit **quando pulsatio id est** expulsio membri incipit intensionem et augetur. et est similis iste textus eidem quod ponit auicenna in 3o canone de signis ulcerum ... et est iste. Et quod saniem inueni in eo quod subponitur alba significat dolorem. et pulsationem fortem id est expulsionem fortem. quia quando sanies est generata dolor est debilis et expulsio membri fortis. **et scias illud quod aggregatur.** Hic autem ponit signa apostematis quod tendit ad saniem et patet quod dicit. Quia in generatione saniei dolor et febres accidunt magis quam facta sanie. Quia in generatione saniei augetur pulsatio post apertionem ex dolore in parte ... Et uidetur non pulsatio est signum complete saniei ut dicitur ... si signa tibi perfecta sunt. quia moratur apostema in eo est augmentatio in quo est pollicitudo et non diminuitur per insensatione ut dicit rasis. in parte resolutiua in dolor et pulsatio. et lenitur locus ut dicit rasis id est mollificatur et albescit. hec sunt perfecta signa saniei. **et scias id quod putrefit.** hic ponit signa apostematis tendentis ad putrefactionem et corruptionem membri. et dicit in 2o Nam primo facit hoc quod ostendit cum quod membrum putrefit et corrumpit 2o ibi **et scias quod dum non submigit.** Et primo quod dicit primo. quod diffinitionem digestionis. quia quando materia difficulter digeritur. tunc est signum quod est materia mala aut quia mala ut dictum fuit 2o. et tenebrositate. sed locus quia tenebrositas loci signum est corruptionis et mortificationis membri. et nec ... reflexionis. Quia quando est ... tunc est signum quod materia est signum corruptionis membri quia quando materia digeritur tunc locus lenitur ut dictum est ... et istarum partium est dubitatio quia uidetur esse diminutus et superfluus. Nam autem hic insinuat solum terminationes apostematis. scilicet quia aut resoluitur. aut maturatur. aut perducit ad mortificationem membri. ibi primo esse diminutum. quia ipse primo causam ... dicit quod apostema callidum aut resoluitur aut maturatur aut lapidescit aut terminat ad mortem membri. Et hic in rasis. Hic autem ponit ... Queritur quomodo est ...

Vnus dum potest ... Possumus dicere quod auicenna non fuit diminutus eo quod hic quartum membrum. scilicet quod conuertatur ad duritiem comprehendit sub hoc resolutionem. unde quia apostema aut resoluitur totaliter tunc signum est ut dicit rasis quod minoratur apostema cum diminutione apostematis et doloris et pulsationis aut resoluitur subtile et indurescit grossum et sic conuertitur ad duritiem tunc signum est ut dicit rasis quod minoratur dolor et minoratur magnitudo apostematis in duritie. Nec etiam fuit superfluus autem quia ipse nec rasis posuerunt quod conuertere ad corruptionem membri et hoc ideo quia raro contingit hoc. scilicet quod materia totaliter uincat naturam. Vnde autem in primo et ... falsa aliquo modo rasis de fine apostematis ... naturam ... et ideo autem ponit hic illud hic non de fine apostematis. et ideo autem ponit in primo. neque rasis. Vnde non quod finem autem non ponit in primo ... membrum conuertitur ad materia apostematis aut uincit naturam et tunc ... aut uincit materia et hoc duplicem mortem et putrefactionem. aut uincit natura materiam et hoc dupliciter. uel materia resoluitur totaliter. aut non saniem complete et tunc materia resoluitur totaliter. aut ... complete et tunc aut procedit in resolutione et tunc resoluitur subtile et grossum indurescit. Aut procedit ... digestionis et tunc conuertitur ad saniem. **Et scias quod dum non submigit natura materiam.** hic autem reddit causam ... corruptionem membri et dicit quod apostema conuertitur ad mortem et corruptionem membri et scias quod dum non submigit id est dum non uincit natura materiam apostematis id est collectionem ... materiam apostematis ut patet ... materiam id est uincit ... resoluit saniem. et sic non respirat id est ... et aliis ... per poros ... calidis ... per operationem membri id est per calore ... in membri ... lorem ... uel membrum ... materia perducat ad mortem ... corruptionem membri. Quia si materia non resoluitur membri et putrefactionem. Et non ... in facit saniem conuertitur ad putrefactionem. Et ... una que dicit natura materiam et tunc ... ut est ... Alia littera que dicit naturam ... **et scias.** ... quod materia ... tamen naturam aliquo et non totaliter ... materia et natura ... non facit in apostemate id est collectionem saniei ... apostematis ad saniem aliquo ... materia ... non respirat id est resoluitur totaliter. et ... resolutionem per ignem et sic ... naturam aliquo ... totaliter apostematis quia quando materia non ... saniem non ... resoluitur ... materia ... maiorem. ... per ignem ... ad operationem membri ... quia materia resoluitur ... calore ... membri ... ad operationem ... resoluitur per ignem ... resoluitur per poros exteriores ad modum ignis. quia materia quando resoluitur subtile eleuatur in uaporem et conuertitur ad ignem **et scias quod quando.** In parte ista ut dictum est autem ponit quoddam signum ... et dicit. et scias quod quando ... pustulle. ut quia primo oritur una. et ... alia. et sic ... in ... pustulle ... pustulle ad modum carbunculi ... malignum id est carbunculum uenenosum et malignum ... pustulle significant ... et ma

autem dicit est quod apostemata calida valde que indigent maturatione debent emplastrari cum psillio et similibus. Et hoc est contra id quod dixi supra i. et cum vides inceptionem apostematis medices in initio eius cum [illegible] dicte infrigidationem etc. Et illud est contra illud aff[orismi] qui dicit sed medicina faciens. potest i.v. quod medicina faciens saniem est medicina calida et non frigida. Sed tunc hic male videtur dicere autem cum dicit quod emplastretur oportet tali apostemati cum psillio et cum aliis convenientibus in curatione [illegible] est ad hoc quod regule [illegible] et ut plurimum medicina faciens saniem debet esse sicut quod ponit auctores et [illegible] apparet [illegible] non percipit. sed per actionem et [illegible] sic potest autem. potest esse maturativa apostematis medicina frigida. et hoc est sicut potest autem in apostematibus valde calidis. et talia apostemata sunt sicut apostema erisipila quia in talibus apostematibus valde calidis calor naturalis valde inflamatur et ideo si apponerentur medicine calide valde inflammaretur in tantum quod prohiberet suum opus quod est digerere materiam et eam mittere in saniem. sed si apponatur medicina frigida tunc prohibetur talis inflammatio caloris naturalis. et ideo tunc calor naturalis confortatur ex appositione talium medicinarum frigidarum. et tunc agit in materiam apostematis et eam convertit in saniem. Propterea quia in talibus apostematibus valde calidis magna fit exsolutio spiritus et caloris. propter frigidum autem prohibetur talis exsolutio. et ideo adiuvat ad faciendum saniem per accidens. Item etiam si non apponerentur medicine frigide propter intensam eius caliditatem rumpetur tale apostema antequam digeratur. et ideo in tali casu sunt apponenda medicinalia frigida. Etiam quod voluimus innuere quod ergo dicit quod autem dixit in illo. s. cum ergo videas. Sed quod autem loquitur i. ut in pluribus et regulariter. Item etiam [illegible] qui dicit calidum saniem faciens intelligitur per se et ut in pluribus. Sed per accidens et in casu non prohibet ut medicina frigida sit maturativa sicut in apostemate valde calido. Sic hic potest autem. Et similiter quod [illegible] quod digita leditur ipsum quia propter caliditatem et incensionem est maior dolor i. et ideo [illegible] potest fieri cum maiore facilitate caro est mollis quia tunc fiet cum minori dolore et ideo dicit quod laminatur cum [illegible] quia fiet tactus facilior. et ideo sic dicit autem alibi et si tamen sunt [illegible] fiat cum facilitate. et. G. [illegible] reddit in illo libro Cave dolorem in [illegible] [illegible] nichil est in tantum cum apostemate sicut dolor.

De erisipila.

Tamen **sanusti causas eri[sipile].** Hic est autem determinat de quodam apostemate calido quod fit ex colera quod nominatur erisipila. et dividitur in partes 2. In prima determinat de eo quantum ad causas et signa. 2o determinat de ipso quantum ad curam. 2a ibi. 2o cap[itulo]. **Oportet ut cura tur i principio.** prima pars dividitur in partes quia primo determinat de causis et signis ipsius erisipile. 2o ostendit in pluribus [illegible] generari. 3o ponit quandam uiditatem sumptam ab ipsa in quadam egritudine [illegible] in [illegible] [illegible]. quia causas ipsius ad insufficientiam ponendo diversitatem medicine erisipile et flegmonis quia de hoc etiam est dictum alibi. 2a ibi. **et ubi plus** [illegible]. **et quando** [illegible]. 3a ibi. **et tu qui tem ista cognovisti.** prima pars dividitur in partes quia primo ponit causas erisipile 2o ponit signa ipsius quibus erisipila distinguitur a flegmone. 2a ibi. **et illa quibus.** Dicit ergo ista [illegible] quod [illegible] erisipile quia cum ipsa est colera pura

et quandam est composita cum flegmone et vocatur erisipila flegmonodes. similiter [illegible] humor colericus si autem [illegible] humor sanguineus vocatur flegmon erisipilatodes. et non solum erisipila potest componi cum flegmone sed etiam cum apostemate molli. ut dicit i. in [illegible] [illegible] quia [illegible] [illegible] in talibus compositis partibus debent nominari oportet secundum quod est una pars sicut etiam debent [illegible] composita alia ille [illegible] quia ex [illegible] simplicium fiunt [illegible] composita autem potest [illegible] secundum maiorem partem [illegible] simplices. et magis [illegible] ad locutionem [illegible] secundum [illegible] [illegible] vel [illegible] [illegible] composita cum illo et sanguineum quod patet flegmonem et [illegible] cum dicit. **et illa quibus discernuntur.** hic autem ponit signa ipsius erisipile quibus discernitur a flegmone. et dividitur in tres partes secundum quod ponit signa [illegible] quibus ipsa distinguitur a flegmone. primo ponit unum signum quod sumitur a colore. dicit quod erisipila [illegible] signa et magis apparet [illegible] rubedine [illegible] rubedinis magis in superficie quia materia erisipile est in superficie et pureiore [illegible] rubedinem quia color colere est rubeus clarus et ex flegmone apparet ad nigredinem declinans aut ad lividitatem et ad quandam offuscationem. et color sanguinis et [illegible] [illegible] in apostemate est color rubeus turbidus et [illegible] [illegible] et plurimum colorem eius est occultus in profundo eius propter grossitiem sanguinis. et ideo materia est in profunda magis quam in erisipila et videns in rubedine erisipile colorem [illegible] [illegible] et non vides [illegible] [illegible] rubedine flegmonis quia color colere est rubeus citrinus. Color autem sanguinis est rubeus turbidus. et ideo [illegible] quandam obfuscationem et nigredinem. **Et apostema erisipille.** hic autem ponit aliud signum per quod distinguitur erisipila a flegmone. et dicit apostema erisipile [illegible] [illegible] non fit nisi in eo quod apparet de cute et cum humor est [illegible] subtilitate [illegible]. et ideo quia colera subtilissimum humorem est penetrat [illegible] carnem quia est rara et non [illegible] nisi in superficie [illegible] in cute. eo quod cutis dura est et spissa sicut dicit G. [illegible] [illegible] de [illegible] [illegible] cum primo. Et flegmon perfunditur in carne [illegible] grossiores [illegible]. et ideo sic dicit G. in [illegible] [illegible] quia sic flegmon fit in carne [illegible] [illegible] [illegible]. sic illud [illegible] erisipila fit in cute et [illegible] [illegible] amplectitur. **Tunc autem.** ponit aliud signum distinguens medicine erisipile et flegmonis [illegible]. et erisipila est pura [illegible]. ut plurimum. et non est ita flegmon quia ut dictum fuit [illegible] ut plurimum [illegible] flegmoni aut [illegible] aut erisipila aut [illegible]. **et pungitur quia ex caliditate erisipile.** hic ponit aliud signum [illegible] erisipile a flegmone [illegible] ex quodam effectu que facit caliditas erisipile et dicit [illegible] [illegible] ex caliditate erisipile [illegible] ut [illegible] [illegible] et hoc est quod materia ipsius est multum acuta et adhusta ut quod est ex colera adhusta. et eius [illegible] [illegible] ad [illegible] ignis et hoc est causa multe caliditatis [illegible] [illegible] in ea [illegible] sicut facit ignis ex quibus vesice egrediuntur quandam [illegible]. et [illegible] in flegmone quia flegmon non [illegible] ut plurimum ad tantam caliditatem et ad [illegible] quia materia eius est magis humor benignus sicut sanguis. unde ut plurimum non venit ad tantam malitiam sicut materia erisipile cuius materia est colera. **Et pura non impellit pectus.** hic autem ponit aliud signum per quod distinguitur erisipila

beo et ducetur cum pistello plumbi. ut sit [illegible]
[illegible] et oleo rosaceo. [illegible] in mortario cum
pistello plumbi. tunc etiam hoc posset poni loco scorie plum-
bi. [illegible] circa istam partem est una dubitatio. quia dicit [illegible]
[illegible] non potest [illegible] ad duo tempora scilicet quo
ad principium et statum. et non potest [illegible] quo ad augmentum
et declinationem. [illegible] non [illegible] ponit. [illegible]

[illegible] cum [illegible] in fine quia [illegible] resolvunt et [illegible]. et semper
[illegible] et cum aliqua infrigidatione [illegible] magna [illegible] quia requirit
[illegible] magne [illegible] ut dictum fuit [illegible].

Formica est pustula. De formica
postquam auctor determinavit de apostematibus [illegible] determinavit de pustulis [illegible]
[illegible] que [illegible] apostematum [illegible]
ut ponitur dicto capitulo. auctor determinavit de quodam apostemate
sive pustula [illegible] que dicitur formica. Appellatur autem tale apostema
formica [illegible] triplicem similitudinem quam habet cum illo animali quod
dicitur formica [illegible] quia formica est pustula valde parva
et [illegible] in ambulatione quia ambulat ad modum
illius animalis. et [illegible] etiam in punctura quia pungit ad
modum puncture formice. [illegible] istas tres similitudines
dicitur [illegible] apostema formica et dividitur [illegible] in partes [illegible] primo de-
terminat de ipso [illegible] practice [illegible]. **Et cum non in
capitulo meo.** [illegible] primo ostendit quod est formica [illegible]
[illegible] species [illegible]. **Et ad si-
mum omne apostema.** [illegible] primo ostendit [illegible]
formica cum quibusdam [illegible]. [illegible] ponit [illegible]
[illegible]. **Et color quem formice.** dicit primo formica est
pustula et non [illegible] quia pustula differt ab apostemate [illegible]
de eminentia parva. apostema autem dicitur eminentia magna [illegible]
maiorem locum. et hoc est quod dicit auctor in primo [illegible]
eminentia [illegible] apostemata. et eminentie [illegible] apostemata
parva [illegible] apostemata sunt eminentie magne. [illegible]
de genere apostematum. [illegible] pustula sub hoc nomine dicitur eminentia
parva. apostema autem sub hoc nomine [illegible] eminentie magne
[illegible] differentie. pustula ab apostemate [illegible]
[illegible] apostema autem non est [illegible]
[illegible] pustula [illegible] pustule [illegible]
oritur tale apostema fuit [illegible] pustule [illegible] quodlibet
[illegible] formica [illegible] formica [illegible]
[illegible] pustule [illegible] formica et ideo dicit autem
est pustula. vel pustule [illegible] et [illegible]
autem accidere [illegible]
[illegible] ad una [illegible] ad ambulatam illa est [illegible]
est apostema [illegible] quia fit ex colera pura [illegible]
valde sicut dictum est supra in capitulo primo istius tractatus. [illegible]
hoc est una alia [illegible] que dicit. et facit accidere
apostema [illegible] quia [illegible] minor. quia hoc [illegible]
[illegible] ad omnes [illegible] formica est apostema [illegible] ut
dictum fuit supra. et ambulat [illegible] tales pustule. [illegible]
[illegible] formica est ambulativa [illegible] acute [illegible]
[illegible] plus et [illegible] illa que fit ex colera pura [illegible]
[illegible] et tarde. [illegible] illa que fit ex colera mixta cum
[illegible] que vocatur miliaris. ut de hoc [illegible]
[illegible] quod est formica [illegible] quia apostema
[illegible] formica. ambulativa in [illegible] et for-
tasse [illegible] ambulativa et fortasse resolutiva.
hoc est [illegible] quod iste pustule ambulative que dicuntur formica
[illegible] ad ulcerationem [illegible] materia est adusta
et tunc fit formica corrosiva. [illegible] tamen resolutive
[illegible] commixtione [illegible] corrosiva [illegible] materia
non erit ita mala. [illegible] autem
[illegible] formice et [illegible]

Duas species formice scilicet ambulativam et corrosivam ... distinguit ambulativam in duas scilicet milliarem et formicam que vocatur ambulativa absolute ... ut apparuit supra ... in primo capitulo huius tractatus. Et potest capi distinctio ... omnis formica aut est ambulativa absolute pura, aut est ambulativa corrosiva ... ambulativa pura ... collera pura ... est una species formice que dicitur ambulativa absolute ... collera mixta cum flemate ... est alia species formice que dicitur milliaris ... ambulativa absolute ... milliaris ... ambulat ... collera pura ... mixta cum flemate ... milliaris ... distinguit unam ab alia ... formice ambulative declinat ... et bothor et pustule apparent plus ad citrinitatem ... milliaria color pustule et bothor declinat ... ad quandam albedinem ut dicit rasis ... In illo vero quod de eo est ulcerati. [illegible]

et oportet ut subveniamus. [illegible]

ulcerationis et nervorum illud quod fortius desiccat sicut medicina [illegible] rum et medicina de lapide et de licio cum vino dulci [illegible] dispergitur [illegible] color vel sicca. Quare est prima sunt fortius desiccativa. Et non admittit spiritus [illegible] sunt ulcera. Et non admittit carnem [illegible]

[illegible] potest quod est addit in mala. Quia tu dices [illegible] [illegible] [illegible] quod illa dixi quod dico quod est ulceratum quod non admittit carnem in quantum potest. Tu potes dicere uno modo quod [illegible] mittit carnem et spiritum qui est [illegible] non dicit medicine [illegible] fortes [illegible] vel medicine grosse que est difficilis ad resolvendum ut supra dictum est.

Quod autem dicit in quo sit [illegible] [illegible] quod dicit et ponatur super labia ulceris medicine fortis siccitatis et fortis [illegible]. Quia medicine [illegible] et ignis [illegible] dicit de fortis siccitatis. [illegible] mittit per siccitatem. [illegible] et autem [illegible] dicit non ponatur carnem mittens [illegible] siccativa [illegible] vel [illegible] potest reddere ad dictum autem alio sic. [illegible] dicit. et non admittit desiccativa quantum potest mittit quod non admittit in ulcere quia licet dantur ad potest [illegible] per ulceris et virulentie [illegible] non sunt apte medicine [illegible] grosse. Quia in medicina grossa non sunt admittenda [illegible] fortia. quia resolvunt subtile et relinquunt grossum et ideo reddit magis [illegible] resolvi. Vel potest aliter dici. Et ideo admittit carnem in quantum potest. [illegible] admittit carnem fortia. quia [illegible] mittit [illegible] potest et in quantum est possibile non debet admittere [illegible] [illegible] forma [illegible] necessarius [illegible] admittere [illegible] [illegible] multum [illegible] debet admittere [illegible] primo quia licet noceat apte medicine que grosse sunt quantum apte ulceris et [illegible]. [illegible] fortius desiccativa [illegible] quantum possibile est. [illegible] necessarius [illegible] admittere [illegible] [illegible] ista ulcera et [illegible] aquositas.

Deinde cum dicit. **Et oportet ut subuenias.** Sed autem docet prohibere perambulationem [illegible] ulcerum [illegible] Et oportet ut subvenias [illegible] quod [illegible] non [illegible] subvenias [illegible] et plus ambulet ulcus et [illegible] adhustionibus et [illegible] et [illegible] inflationibus. [illegible] oportet duobus subvenire [illegible] subvenire primo ne illa ulceratio perambulet et [illegible] caliditate et adhustione in longis [illegible] et illud fit [illegible] et [illegible] ponendo [illegible] ulcus. [illegible] ponatur ulcus [illegible] remanet ulcus [illegible] magna caliditate [illegible] [illegible] [illegible] ulcus [illegible] et [illegible] spiritus [illegible] sabam et [illegible] antiqua [illegible] [illegible] [illegible] ulceratione. [illegible] caliditas. [illegible] [illegible] magis [illegible] abstergit et [illegible] corrosivus ut dicit Sapio [illegible] de simplicibus medicinis [illegible] dicit autem [illegible]. Quia [illegible] illa [illegible] olei quod [illegible] ulceribus corrosivus et ambulativus.

De inflationibus et vesicis

Inflationes autem et sanguinem. [illegible] quibus [illegible] quod dicit vesice et inflationes. et in [illegible] primo [illegible] distinguit [illegible] inflationis vesicarum [illegible] quot modis possunt accidere inflationes et vesice. 2° ad [illegible] cura [illegible]. **Mundificatio quidem corporis.** Dicit primo [illegible] quod [illegible] dicit [illegible] inflationis accidit ex ebullitione humorum [illegible] subtilium ex qua ebullitione elevatur [illegible] [illegible] [illegible] et fit inflatio aquosa [illegible] aqua subtilis [illegible] inflatio [illegible] apparet vesica [illegible] vesicas quod accidit ex adhustione ignis ut dicit [illegible] de vesicis. [illegible] 2° modus inflationis est ex humoribus grossis. quia loco aquositatis est quedam virulentia ad modum aquositatis. [illegible] ista inflatio magis [illegible] [illegible] quam [illegible] ex humoribus magis grossis [illegible] inflatio non est vesica sicut prima [illegible] inflatio et prima dicitur [illegible] vesica. [illegible] inflationibus et vesicis. et [illegible] quod dicit autem in [illegible] [illegible] est ut fit loco aquositatis sanguis [illegible] loco aquositatis fit sanguis virulentus [illegible] [illegible] subtilis. Expone quod [illegible] ista virulentia sanguinis [illegible] magis [illegible] quam sit aquositas [illegible] vesicas [illegible] est aquositas sub prima cute. quia est ex [illegible] subtilibus. [illegible] reddit [illegible] magis [illegible] aquositas est grossior [illegible] illa [illegible] ex humoribus grossioribus.

Cure inflationum et vesicarum

Mundificatio quidem corporis. [illegible] autem post curam istarum vesicarum. et dividitur [illegible] in 2. Nam primo ponit curam istarum per [illegible] [illegible] dicit. 2° ponit curam in medicinis localibus [illegible] **Et ponantur super eam imprimis.** Dicit ergo primo. Mundificatio quidem [illegible] et [illegible] subtilibus [illegible] [illegible] sicut [illegible] in [illegible] capitulo [illegible] [illegible] cum [illegible] [illegible] [illegible] in primo libro [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] ventosas [illegible] [illegible] [illegible] modo quo dictum est in [illegible] in libro primo et [illegible] ut expone quod dictum est in [illegible] [illegible] [illegible] [illegible] sanguinea [illegible] expone quod dictum est [illegible] [illegible] sanguinea [illegible] vesicis.

Deinde cum dicit. **Et ponantur super eas.** Nunc autem ponit curam istarum vesicarum [illegible] ad localia medicinalia et dividitur in partes [illegible]. Nam primo ponit [illegible] curam istarum vesicarum quando incipiunt. 2° ponit curam quando complete sunt. 3° ponit curam ipsarum quando sunt ulcerate. 2ª ibi. **Si autem creverint** [illegible] ibi. **Et si ulceretur.** Dicit primo et [illegible] [illegible] illud [illegible] illud [illegible] [illegible] [illegible] in loco suo [illegible] decoctione et [illegible] [illegible] [illegible] tepide [illegible] [illegible] decoctum et [illegible] lene quod possit [illegible] super [illegible].

Deinde cum dicit. **Si autem creverint.** Hic autem ponit curam vesicarum [illegible] possunt prohibere [illegible] [illegible] dolore [illegible] [illegible] [illegible] exteriori cute [illegible] [illegible] [illegible] [illegible] [illegible] sunt [illegible] sanguinee in loco aquositatis [illegible] Iste sunt ille que sunt sanguinee in loco aquositatis [illegible] [illegible] in grossiori cute [illegible] profundior magis [illegible] quia sunt sub [illegible] cute et faciunt maiorem dolorem [illegible] [illegible] [illegible] magis profunda sicut dictum fuit supra. [illegible] maior [illegible] maiore profunditate [illegible] est in eo. Et [illegible] [illegible] sunt subtiles [illegible] sunt [illegible] cutanee. et iste sunt que fiunt ex ebullitione humorum [illegible] subtilium ex qua ebullitione [illegible] vesice in quibus [illegible] aqua subtilis sicut est in vesicis que fiunt ex adhustione ignis. et [illegible] [illegible] subtiliantur [illegible] et quia profunde non sunt [illegible] et non est necesse [illegible] [illegible] sicut [illegible] primus. Quia [illegible] aqua [illegible] [illegible] vesicas [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] ulceraret. et ideo non oportet tardare ad aperiendum [illegible] ne ulcus [illegible]. Deinde non [illegible] [illegible] [illegible] post aperturam [illegible] non sanatur [illegible] apertione illa. ut [illegible] non [illegible] aliqua corrosio quia [illegible] [illegible] illa aqua [illegible] consolidantur [illegible] ulcerantur. [illegible] aut [illegible] ad ulcera [illegible] [illegible] post illud cura illa [illegible] autem [illegible].

Deinde cum dicit. **Et si ulceretur.** Nunc ponit curam vesicarum quando sunt ulcerate. et in primo [illegible] [illegible] [illegible] autem [illegible]. Nam primo ponit curam vesicarum ulceratarum in quibus non est caro corrupta et putrefacta. 2° ponit curam vesicarum

Unum quodque istorum

Deinde quod de istorum est malum dicit Rasis. Sed tamen dicit Avicenna: minus malum est rubeum, quia est ex humore minus malo. Deinde citrinum vel viride, quia est ex humore peiore et magis adusto. Deinde nigrum. Et puto intelligit omnia illa esse nigra, quia est ex humore venenoso pessimo et magis adusto. Et credo quod dicat Avicenna exceptis dictis dicentium quod aliud est album et dictum [illegible] qui faciunt decurrere quod omnis pustula sit antrax vel altoym.

Sed est dubium unum de hoc quod dicit hic Avicenna: ex eo quod ad nigredinem declinat non evadit aliquis. Quia illud videtur falsum et [illegible], quia ego vidi de hiis multos homines evadere. Dico quod sine dubio nos non possumus negare quin tales evadant, quia ego vidi. Sed tamen Avicenna dixit proprie quod non evadit aliquis, quia forte regio in qua erat Avicenna erat calidissima. Et ideo, quia est morbus de materia calida adusta, ideo quando fit in regione calida augetur eius malitia et eius adustio. Et ideo forte regio in qua erat Avicenna erat calida multum, et ideo ex hoc augebatur eius malitia. Et tunc ille qui est niger fit de materia venenosa et multum adusta; ideo forte in sua regione nullus evadebat de eo quod erat nigrum. Sed de aliis qui non erant ita nigri, sed qui non fuerunt de materia tam venenosa et adusta, evadebant. Et ideo dicit forte, et ex eo quod ad nigredinem declinat non evadit aliquis, quia videbat omnes mori in regione sua. Sed in regione nostra, quia non est tantum calida, non additur eius malitia ex aere, et ideo possunt aliqui evadere. Et multi in Aragone et Italia qui apud nos est multum niger, sed pauci licet venenosi. Et potest aliud dici et melius, quia Avicenna qui dicit: ex eo quod ad nigredinem declinat non evadit aliquis, intelligit quando altoym est in locis emunctoriis; tunc est mortale et de istis [illegible] palidum et rubeum. Deinde citrinum et nigrum autem aliud evadit propter malitiam eius materie. Et quod sic intelligat Avicenna patet per ipsum Rasim, et est necessarium ut sit decurrens corporis illud quod venit ex ibi et defendit multum quod altoym quod fit in locis emunctoriis est mortale. Post [illegible] post illud capitulum dicit et palidum altoym mortalium, id est illorum altoym qui sunt in predictis locis, quia illa sunt mortalia. Palidum id est minus malum est rubeum, deinde citrinum. Et [illegible] ex rubeo potest aliquis evadere, et dato quod sit in locis emunctoriis, sed ex isto quod est nigrum, sic est mortale ut quod in locis emunctoriis non evadit aliquis, et hoc est propter malitiam materie. Et propter propinquitatem ad radicem, principalis si altoym fiat in locis emunctoriis nullus evadit. Quod sic ergo tu dicas quod multi evadunt, dico est quod non nascitur in emunctoriis; sed qui nascitur in illis emunctoriis nullus evadere potest. Et quod hoc non est nigrum potest esse ut evadat, quia materia non est ita mala ut dictum est prius.

Et altoym. Dicendum in quo tempore magis multiplicatur, et dicit quod in pestilenciali regione et non mirum. Deinde cum ille et dicit quod in pestilenciali regione [illegible] pestilencialis, eo quod est ex materia putrida venenosa quo tractatur [illegible] sua forma. Tamen quod de pestilencia sibi generatur [illegible] et ideo dicit Rasis: si in aere sunt pestilencie tunc erit malum, quod cum [illegible] et adiungatur tunc malitia aeris cum malitia morbi. Item etiam generatur magis ut dicit Rasis in autumpno et in fine estatis, et hoc est propter sanguinem adustum [illegible], quia in ipsis temporibus vene calores generantur talia apostemata. Et mucian. Hic ponit plura nomina que significant quod illud altoym. Tamen dicit Avicenna quod apud nos non est distinctio apud nos nominatione. Quia ut dicit Galenus in libro de ingenio sanitatis, de nominibus non est curandum, dummodo res intelligatur.

Est autem unum dubium circa totum capitulum, quia dictum est quod antrax est apostema quod infertur cum eo quod dicit mala qualitate ad cor. Contra antrax non est, quia sua materia antracis venenosa expulsa est ab interioribus ad exteriora sicut ad cutem. Ergo si materia est in interioribus [illegible] non potest natura mittere. Ymo expulsa est ad exteriora multo minus potest natura mittere materiam que est in exterioribus propter expulsionem ad exteriora, quia si materia in interioribus non potest natura mittere, que fuit expulsa ad exteriora, ergo materia in exterioribus non potest simul retrahere ad interiora et natura, que multo fortis potest expellere. Contra quo ergo mittit. Dico breviter quod expellitur ad superficiem, quia natura dicitur

natura movere aliquando totaliter, aliquando pro parte; dicitur cum et non totaliter aliquando [illegible] dicitur cum evadentibus ad propria que natura expellit [illegible] in interioribus ad exteriora. Natura primo dicitur materia non totaliter, et natura sua [illegible] dicitur cum totaliter non generatur in apostemata sed resolvitur ipsa vel sensibiliter vel insensibiliter per poros. Dicitur ergo sibi aliquo modo, unde sed quod est potens in expellere ad exteriora et quod non dicitur cum totaliter est materia reflectitur in cute et fit in apostema. Et quod materia est venenosa et de natura veneni est prope cor, sic videmus si aliquis serpens mordeat aliquem tunc venenum si pervenerit penetrat ad cor et interficit. Sic etiam materia que est venenosa et retracta in cute statim respirat ad cor per via arteriarum et si pervenerit interficit propter multitudinem eius et ipsius malignitatem. Et tu dicas natura fuit potens expellere de interioribus ad exteriora, ergo multo erit fortior potens expellere. Ergo illud non est verum, quia licet natura fuit potens in medicinis super ipsam materiam quo deinde quod fuit potens in expellendo ad exteriora, tamen quia materia illa reflectitur in cute et facit apostema et est venenosa et de natura veneni est prope cor, ideo cum natura sit debilitata primo ex illa expulsione non potest resistere, et sic primo et magis quam materia est venenosa et multa, et etiam si pervenerit sic de veneno appropriatis potius ut dictum est de veneno superius, interficit.

Ulterius notandum unum notabile circa istum morbum: quia altoym sic fiat in febre acuta una quod ipsa sequatur vel precedat est signum mortis propterea eo quod signat materiam corruptam et venenosam generari in venis que faciunt febrem. Et hoc est quod dicit Ypocras in pronosticis: Si in egro corpore fuerint antraces vel carbunculi aut aliqua mala sive superfluitates genuit oportet attendere quod si separatum fuit et colore lividum vel viridem vel citrinum pestilentia mortem propinquam dicit. Et autem addit quod si separatum fuit quod [illegible] signum propinquum sufficiens. Et tu potes intelligere unum[?] si etiam antrax separatur aut quod non [illegible] aliqua visu aut quod non [illegible] tunc per cutem sit [illegible] ex ipso demonstratur signum debilitatis virtutis non potentis reterminare ex materia malitia eius magis venenose et multitudinem ipsius et sic est per accidens. Et si altoym non fiat in febre acuta sed fiat febris in eo tot caliditatis ipsius, sicut ut plurimum apostema calidum maxime valde calidum corpus sequitur febris, non propter hoc dicit mortem propter. Tamen dicitur in corpore egro intellige egro [illegible] si propter febrem acutam.

Curatio quidem cui floia est cum eo, etc. In quo curatio. Cum dixit Avicenna causas de cura altoym in quo signato quod intendimus et cum hoc dico sint natura primo post curam ipsius alterius que attendit per rectificationem totius corporis et cordis. Et post curam localem etc. Altoym. Prima posset dividi in plures partes sed non est ibi. Primo ergo ponit ultimam curationem totius corporis et hoc est rationis et dicit curationem cum phlebotomia est quod curatur cum eo quod tollitur hora necessaria.

Et circa hoc est dubium unum, quia videtur non competere flebotomiam in ista egritudine per tertium Rasis Diaforum[?] in suis dictis de antrace, et non oportet ut fiat flebotomia in hac egritudine. Ymo flebotomia de[illegible] necessaria ut quod oportet corpus. Dico quod flebotomia competit in hac egritudine et competit ergo primo si corpus est plectoricum, totum corpus flebotomia, quia minorat plectoriam corporis et cum movetur apostema non competit in hoc ergo sui et hoc dicitur competit per et cor ne eo quod sit a sanguine adusto. Et principio incipit vel si ulterius adustione generatur alii humore competit flebotomia et etiam scarificatio. Et ideo Avicenna ponit flebotomiam et scarificationem. Et hoc est quod dicit Galenus in libro de ingenio sanitatis loquens de carbunculis et prunis et de omnibus talibus que fiunt ex sanguine adusto et malo. Quibus ideo necessarium est evacuare ut flebotomia si recenderit in quo [illegible] in flebotomia si sanguinis usque ad defectionem trahatur ultimum tempus si pro hoc non apparuit. Item etiam competit flebotomia ipsa causa quia est acutissima et magis et non solum competit flebotomia, verum largius competit eius usque ad sincopim. Et hoc est quod dicit Galenus in ingenio ut [illegible] curare contigit de multis [illegible] cum est flebotomia usque ad defectionem in pacientibus quibus sic in acutissimo apostemate [illegible] refrigerare statim cor et sic conservantur.

Addit autem Avicenna cum eo quod tollitur hora necessaria, ut ostendat horam necessariam, quia flebotomia debet fieri in principio et antequam incipiat constans

que medie dicuntur administrari [illegible]. **Et oportet ut ponantur.** Dicit ergo primo et similiter idem super locum sephiros sic quod resolvat et lenificet sit in mediocri [illegible] et mollitiem [illegible]. Et cum autem tangit hic [illegible] medicinis quod [illegible] solum si non complete tangit [illegible] complete tangit per [illegible] ut ostendit [illegible] non [illegible] sephiros [illegible] quod dicit statim post [illegible] aliqua medicina [illegible] resolvit et confortat [illegible] mollificatione [illegible] medicina non sit mollificativa [illegible] aliqua medicina mollitiva [illegible] resolutionem subtiliat. [illegible] lapideitatis propter confortationem et resolutionem [illegible] cum dicit **Et oportet ut ponatur.** In ista parte autem ostendit [illegible] medicine [illegible] in hac [illegible] et quo ordine debent administrari et [illegible] medicinis simplicibus [illegible] **Et iterum.** Prima in 2. Primo ostendit [illegible] medicine localis et quo ordine debent administrari et [illegible] 2o ostendit [illegible] secundum diversitatem [illegible] sephiros [illegible] **Et diversificatur.** [illegible] primo autem [illegible] ostendit [illegible] et quales debent esse medicine locales [illegible] ostendit quod medicine ille debent administrari secundum ordinem. 2o ostendit quid sit faciendum quando administrantur medicine secundum unam [illegible] et quid quando administrantur secundum aliam [illegible]. **Et sit ille [illegible] et oportet ut fame patiatur.** Dicit ergo primo [illegible] ut ponatur [illegible] ad localia [illegible] quarum una [illegible] resolvens cum lenitate cum eo quod non confortat fortiter [illegible] secundum unam [illegible] debent administrari medicine resolutive et non fortiter confortative [illegible] medicine resolutive debent esse leves quia omne confortans [illegible] potest exponi duobus modis, uno modo sic [illegible] quod medicine resolutive debent esse leves et non forte quia omne resolutivum [illegible] fortiter confortat [illegible] medicine confortative non [illegible] sephiros [illegible] debent administrari medicine leves resolutive et non fortiter confortative. Alio modo potest exponi [illegible] ut dicit [illegible] quod medicine resolutive sint cum lenitate [illegible] confortat et non debent [illegible] quia omne resolutivum [illegible] confortat [illegible] et ideo [illegible] medicine resolutive [illegible] multum [illegible] quia medicina resolutiva [illegible] ipsum evaporare et expellere ipsum de loco in quo fuit receptus [illegible] assiduationem operis [illegible] illud quod [illegible] quia medicina resolutiva expellit humorem de loco et confortat [illegible] et hoc est quod dicit auctor de medicina desiccativa [illegible] dicit [illegible] quod medicina confortativa [illegible] humiditatem suam resolvendo et subtiliando suam [illegible] medicina resolutiva confortat [illegible] medicina resolutiva desiccat [illegible] desiccatione [illegible] confortationem et sic fiat magis confortatio [illegible] cum lenitate. Et [illegible] resolvit [illegible] potest exponi duobus modis. Uno modo [illegible] resolvit [illegible] resolvit et ideo [illegible] quia [illegible] medicine [illegible] est solum mollificative [illegible] ipsum ad resolvendum, et resolutivum resolvit et non confortat [illegible]. Alio modo potest exponi quod [illegible] resolvit [illegible] et non cito et subito [illegible] resolvit [illegible] paulatim et in longo tempore et illud est verum quia [illegible] ampliat poros et [illegible] ad resolvendum. Et ideo [illegible]

[illegible] poros et [illegible] ad resolvendum, et tunc [illegible] ad [illegible] medicine resolvit de humore sic [illegible] paulatim per poros ampliatos, et ideo [illegible] resolvit paulatim [illegible] bonum est ut premisceatur cum resolutivis ut non permittat [illegible] resolvere humores subtiles et grossos dimittere sed faciat ipsum equaliter resolvere [illegible] non per unam partem plus quam per aliam. Ulterius notandum quod licet sit dictum quod medicine resolutive debent esse leves [illegible] non est intelligendum [illegible] quod medicine resolutive non debent [illegible] et aliquo desiccare [illegible] resolutive debent esse [illegible] plus mollitive sed non debent esse confortative [illegible] dicta [illegible] debent esse confortative leves [illegible] dicta fuit [illegible] et quod [illegible] sequendo statim dicit autem. Et oportet ut sit gradus [illegible] medicine resolutive est aliter [illegible] primo sic [illegible] debent esse confortative sed debent esse leves [illegible] quod una [illegible] sephiros [illegible] ad localia est [illegible] resolutiva. Sed [illegible] quod oportet [illegible] ipsius est [illegible] mollificativa. Deinde cum dicit **Et sint iste due.** Hic ostendit autem quod iste 2 [illegible] debent administrari secundum ordinem et dicit et sint iste 2 [illegible] ut quando una [illegible] et alia sequatur et non curat [illegible] ordine [illegible] primo [illegible] ut lenificet. Deinde [illegible] resolvat. Deinde [illegible] resolutive [illegible] quod resolvitur ne quod remansit fiat lapis [illegible] 2o [illegible] ad mollificationem et postea ad resolvendum quousque totus humor resolvatur. Sic ergo debet procedere mollificative et subsequenter resolutive. Deinde cum dicit **Et oportet ut fiam[illegible].** Hic autem ostendit quid sit faciendum quando administrantur medicine secundum unam [illegible] et quid quando secundum aliam [illegible] dicit [illegible] quando volumus resolvere oportet ut [illegible] fiat [illegible]. [illegible]

[illegible] in vulnere quod [illegible] vel quod eorum dicta sonus. Alia intentio est solum sine partis conservare et administrare medicamenta consolidativa et conservativa carnis in vulnere ex quo homo intelligamus modum [illegible] exponendo literam. Dicit ergo hic alias intentiones quas potest Galenus observare in vulnere cavernoso simpliciter. Intendit in hac parte ponere tres intentiones: una tertia intentione et secunda. Dicit autem intelliguntur per positionem, et potest sic dici: situatio et ligatura et prohibitio sanguinis et ae... per hoc quod dicit situatio et ligatura et prohibitio sanguinis et [illegible] quod est ad eam. Ista ut dicta est prima et secunda intentio completa quos ponit ad ea. Sed ut dicta est prima et secunda intentio completur per ligaturam et situaturam. Alia est situatio si in vulnere magis per ligaturam et situaturam [illegible] ad locum quo autem posita dicit et prohibitio figere [illegible] ad [illegible] de quo nunc positis dicat et prohibitio fluxus superfluus humidi ad locum, quo autem fuit situatio et ligatura dicitur positionem quodam ad quod fiunt de ligatura vulneris. Et sunt hic non fiat mentio quia loquitur de ipsarum specierum ipsius vi loquitur de vulnere in quo necessaria est situatio. Prohibito autem sanguine et aquositate ad locum vulneris fluxum [illegible] per causas fuit prius [illegible] prohibetur [illegible] ad locum vulneris [illegible]. Secundam intentionem ponit autem cum dicit et prohibitio [illegible] ne aliqua res [illegible] in debet prohibere ne aliqua res [illegible] in cadat intra labia vulneris neque pulvis neque oleum neque aliud neque aliqua res [illegible] reddit. Galenus [illegible] quod dicit Galenus [illegible] observandum est ne cadat intra labia vulneris neque pulvis neque oleum. Quidam medici dicunt [illegible] male. Galenus et dicunt quod pulvis incarnativus sic est pulvis rubeus [illegible] qui fit ex olibano, aloe et sarcocolla et sanguine draconis partibus equalibus non debet poni intra in orificio vulneris quia dicunt ipsi Galenum dicere quod debet observare ne cadat aliquid intra labia vulneris neque oleum neque [illegible] neque pulvis et cetera quod hic ipsi ut observet dictum Galeni quod dicit quod iste pulvis conveniat vulnera ponunt primo super vulnus peciam madefactam in albumine ovi et postea super peciam ponunt pulverem. Et sic putant se salvare dictum [illegible] auctoris. Sed isti medici male dicunt et male operantur. Male dicunt in hoc quod dicunt quod pulvis qui est incarnativus non debet poni super orificium vulneris intra. Primo quod est contra Albucasem vel [illegible] qui dicit sic. Si fuerit vulnus et fuit parva simplex tunc [illegible] et facilis ita ut pulveres super eam pulverem [illegible] mittatur ea [illegible] et modus pulveris [illegible] olibani [illegible] sanguis draconis [illegible] calcis non extincte [illegible] [illegible] et impleatur ex eo vulnus et constringatur compositione bona [illegible] adhereat super ipsum et coaguletur cum sanguine [illegible] ergo [illegible] male quod pulvis qui est incarnativus debet poni in orificio vulneris intra. Item etiam omnes auctores ponunt quod vulnus in quo [illegible] vulnus [illegible] per medicamenta incarnativa [illegible] principalis intentio vulneris [illegible] vulnus est ipsum [illegible]. Ex [illegible] autem non potest [illegible] super ipsum orificium vulneris ponatur cum [illegible] quod est in vulnere sit intra in vulnere [illegible] tunc cum tales medicamenta [illegible] sunt intra quod incarnativa dicuntur. Et ex talibus medicamentis incarnativis sunt quidam pulveres male ergo dicunt isti quod tales pulveres non dicunt poni super orificium vulneris intra in vulnere et postea super peciam ponunt super orificium vulneris ponunt talem pulverem. Quia frustra ponunt iste pulveres. Cum enim actio et passio sit per contactum et pulvis non tangit orificium vulneris intra [illegible] ibi et ideo ad [illegible] ponitur et [illegible] dicas quod virtus agit in illo plus. Quia virtus eius penetrat per peciam usque ad vulnus. Dico quod virtus eius non potest penetrare per peciam usque ad vulnus de quo sit intendendum per [illegible] [illegible]. Et si penetrat [illegible] tunc [illegible] tangit vulnus [illegible] [illegible] eadem ratione potest primo poni in pulvere ubique aliquo medio. Dicunt ergo per dictum quod dictum est non verum. Et [illegible] quod ipsi [illegible] per dictum Galeni. Et autem quod dicunt quod nos debemus cavere ne intra labia vulneris cadat pulvis aut oleum aut aliud. Nos possumus intendere duobus modis. Uno

quod Galenus et autem intelligit de pulvere [illegible] sicut est pulvis [illegible] et de aliis rebus [illegible] eo quod [illegible] prohibet incarnationem vel conglutinationem. Immo faciunt ea incarnatione [illegible] contrarias quam [illegible] [illegible] dicet. Et ideo Galenus et autem ponit intentionem [illegible] intentionem [illegible] conservare [illegible] per medicamenta [illegible] [illegible] [illegible]. [illegible] Galenus et autem apparet manifeste quod debes medicamenta incarnativa in vulnere licet aliquando illud non sit necessarium ut quod vulnus est parvum [illegible] quod sola ligatura consolidat. Sic ergo Galenus et autem intelligit de pulvere [illegible] et aliis rebus [illegible] quod non faciunt consolidationem. Alio possit exponere dictum Galeni et autem magis [illegible]. Quia [illegible] per illa corpus loquitur quod ad [illegible] de omni pulvere [illegible] et primo quod non [illegible] de aliquo pulvere. Secundo quod non [illegible] probabile quod loquatur de pulvere [illegible] quod [illegible] quia mittit [illegible] in vulnere. Cum ergo [illegible] non [illegible] quod prohibitio fiat contra de isto pulvere. Immo possumus [illegible] exponere dictum Galeni et melius. [illegible] Galenus et autem dicit quod cavendum est ne intra labia vulneris cadat pulvis. Dicimus quod [illegible] quod cavendum est ne cadat pulvis intra labia ne cadat intra in profunditate vulneris et tunc sic exponendo est verum de omni pulvere. Quia etiam omnis pulvis incarnativus non debet cadere intra in profunditate vulneris ne remaneat in aliquod spatium per quod prohibeat perfectam [illegible]. Unde medicina incarnativa debet poni solum in superficie vulneris et hoc [illegible] per illa autem in sequenti capitulo. Dicit [illegible] medicamenta incarnativa sunt illa que aggregant intra duo labia elongata et non ut oportet per [illegible] superficie labiorum faciunt adherere. Ergo per illa apparet quod medicina incarnativa debet poni solum in superficie exteriori vulneris et ideo [illegible] pulvere incarnativo ne [illegible] cadat in profunditate vulneris. Sed [illegible] potest poni [illegible] in superficie vulneris. [illegible] etiam [illegible] expositio [illegible] [illegible] quia illi intelligunt quod [illegible] debet poni intra pulvis incarnativus [illegible] [illegible] quod dictum est prius. [illegible] autem ponit [illegible] [illegible] que requirit in vulnere simplici. [illegible] dicit [illegible] [illegible] [illegible] Dicit autem quod [illegible] [illegible] [illegible] observandum sunt in vulnere simplici. [illegible] conservare [illegible] [illegible] [illegible] observare, id est administrare medicamenta que incarnant vulnus talia que sunt [illegible] carnis [illegible] et conservativa [illegible] [illegible] autem ut dicit Galenus in tegni fit per medicamenta [illegible] [illegible]. Addit [illegible] autem [illegible] et [illegible] [illegible] ne atrahat ad membrum sanguis [illegible] et [illegible] [illegible] et qualitate. Quia sanguis [illegible] sui qualitate sive quantitate est impediens consolidationem vulneris ut ponitur [illegible] per Galenum tertio de [illegible] [illegible]. Et ex hoc quod autem dicit et sollicitum [illegible] ne atrahat ad membrum sanguis [illegible] prohibendo fluxum humorum ad locum quando est prohibet fluxus humorum ad locum [illegible] male [illegible] vel [illegible] tunc non atrahit ad membrum sanguis [illegible] [illegible] in hoc quod dicit hic autem confirmat id quod dixit in primo et prohibito sanguine et [illegible] [illegible] [illegible] istam [illegible] intentionem quam ponit Galenus et autem observandam in vulnere sunt plura intelligenda. Primo est intelligendum quod Galenus [illegible] [illegible] quorum [illegible] [illegible] [illegible] autem [illegible] [illegible] quod [illegible] [illegible] [illegible] ad [illegible] et hoc [illegible] [illegible] autem quia non [illegible] [illegible] [illegible] [illegible] quod ad [illegible] eo quod tunc illa [illegible] non [illegible] per quod tunc [illegible] indigeat observatione [illegible] [illegible] consolidatione non [illegible] [illegible] [illegible] quia tunc est [illegible] et ideo [illegible] indiget observari. [illegible] autem [illegible] [illegible] membrum [illegible] [illegible] [illegible] [illegible] [illegible] medicamenta quo [illegible] et membra suas operationes [illegible]. Cum ergo talis incarnatio labiorum fiat per operationem [illegible] [illegible] [illegible] operatione [illegible] [illegible]. Et [illegible] [illegible] ad hoc ut bene fiat.

contrigatiua debeat desiccare quia non debeat desiccare
plus quam medicina incarnatiua que desiccat in primo ut dictum fuit
plus et non debeat tamen desiccare ut desiccat ipso carnem
sic facit ea. possumus ergo quod dicitur esse desiccatiua in secundo gradu
uel circa id per reuma ad que natura habetur secundum quod etiam dictum est
supra. Ultimus autem non uult quod aliud ponit in primo secundum
quam. capitulo de cura so. [illegible] quod contrigatio proprie fit primo fit ab
eo quod est fortis operationis et sunt in qualitatibus tamen

catiua et abstersiua in secundo gradu per rationem ad minus quia
talis medicina diminuit et desiccat carnem et qui fit de
siccat et diminuit carnem siue corrodat. dicitur ergo esse talis medicina
desiccatiua et abstersiua per ratione in membris in quo adhuc
fluat in 3o gradu. Et tu dices in qualitatibus actiuis quo dicitur
esse ad quod etiam potest esse in 4o gradu etiam. Uide si sit in qua

ulcera [illegible]. et totum id quod dicit hic autem est
planum ex eis que dicta fuerunt in 1o capitulo et ideo hic non
insisto. Tunc ostendit autem qualis autem est facienda
post perforationem ipsorum uulnerum dicens. Deinde ponatur
ponatur epithima absque mordicatione. et est [illegible]
et quod quando [illegible] fuit disposito parata. tunc non
[illegible] in eis et [illegible] carnem et consolidare habet

[illegible] ea que operatur absque mordicatione ut dictum fuit prius
[illegible] autem [illegible] ad eam dictam sanguis in capitulo de perforatione
[illegible] quia quando [illegible] uel [illegible] uel uulnus

et fluxum [illegible] qui accidit per dolorem que fit cum [illegible]
non dicitur ponere [illegible] ea que ponit [illegible] hoc dicitur ponere ad quod
sedet dolorem et prohibeat fluxum sanguinis sic omnes [illegible]
hodie ponunt album oui quod restringit fluxum sanguinis
et mitigat dolorem et prohibet fluxum. post hoc autem dicitur po-
nere ea que autem dicit. [illegible] que posita sunt in tabula me[dicin]arum
singularium. si in 3o libro. Et puluis melior est eis quam olibanum
per puluerem olibani ego intelligo corticem olibani quia cortex
est magis desiccatiuus quam ipsum olibanum et hoc est ad sub[illegible] autem
quia id est uehementius stipticus et uehementius desiccatiuus quam olibanum
Et tu dices [illegible] quod hoc est melior cortex olibani quam olibanum cum
sit uehementius desiccatiuus cortex olibani cum hoc est. Quia in uul-
neribus magnis et grauibus oportet fortius epithima quam in paruis
et superficialibus ut G. dicit [illegible] de ingenio sanitatis. Quia ad uul-
nus magnum currunt plures humores et superfluitates
et propter hoc quia cortex olibani est magis desiccatiuus quam olibanum
id est melior istis uulneribus. Deinde cum dicit **Et rec-

que possunt accidere post sectionem dicens et certum quidem
est. [illegible] non [illegible] eis aqua in [illegible] frigida calida cum
est. [illegible] et [illegible] et mollificat. et mitti-
[illegible] Et [illegible] etiam [illegible] aqua mellis de aqua [illegible] quia
si quis dicat quod non [illegible] eis aqua mellis [illegible]
de aqua [illegible] non est uerum. ut si omisisset cum melle
[illegible] [illegible] [illegible] et aliis commisisset.
tunc est possumus bene cum ea lauare uulnus et [illegible] flu-
xum sanguinis [illegible] [illegible] fuit prius in capitulo de epithimatis. et
[illegible] si accidat sicut quod dictum fuit prius in capitulo [illegible] et
mellis non solum non dicitur eis aqua sed etiam oleum uel unguentum
in quo sit pinguedo uel sepum [illegible] [illegible] ut dictum
[illegible] autem in primo [illegible] capitulo de
[illegible] et etiam hoc dicit autem in primo [illegible] capitulo de
[illegible] [illegible] mitigandi dolorem uel [illegible]
[illegible] [illegible] sic ponimus aliquid basilicon ut quidem in [illegible]
[illegible] [illegible] sic [illegible] istis accidentibus quod est oporte-
[illegible] in libro 6. si non contingit istis accidentibus [illegible]
[illegible] non oportet hoc. [illegible] ponere hic epithima absque mor-
dicatione ut dictum est. et propter hoc male faciunt quidam cirurgici
qui statim post [illegible] ponunt quoddam [illegible] factum
ex oleo et uitello oui et [illegible] et aqua omnia [illegible]
sunt putrefactiua et mollificatiua non [illegible]. sed dicitur ponere
[illegible] album oui quod id non putrefacit ymo restringit sanguinem
[illegible] [illegible] et mitigat dolorem. Et post appo-
[illegible] prohibet fluxum [illegible] dicitur ponere epithima que dicta sunt. et si fuit
[illegible] [illegible] ponere [illegible] quod [illegible] [illegible] sufficit [illegible] hoc est
necessarium [illegible] aqua. et ergo non [illegible]
non per uulnus [illegible] aliqua alia [illegible] per qua ipsum [illegible]

Necessarium est in his uulnerib[us]

Quia in uulneribus superueniunt accidentia que alias
impediunt curationem uulnerum. sicut si accidat eis
apostema aut dolor. aut mala [illegible]. ideo circa autem introduxit
[illegible] capitulum quod est de regimine uulnerum habentium apostema et dolorem
et quia omne accidens quod accidit uulneribus potest reducere ad
unum istorum duorum uel ad apostema uel ad mala [illegible] et quod
dolor qui eis non est [illegible] per apostema aut per malam [illegible]
id circo autem diuisio facit primo docet de regimine uulnerum

illa accidentia de quibus loquitur sunt posita non contingent antequam [illegible] intendit ad curationem fracture et tamen ostendit quale nocumentum contingit ex ignorantia fracture occulte propter quam negligitur cura eius et sic post aliquot dies inde putrefactio subsequitur ostendit qualia nocumenta vel accidentia in spatio contingunt et que accidentia cum sequitur putrefactionem factam subossea dierum. **et accidit ante famositatem** id est ante tale putrefactionem ut post ipsam contingat [illegible] accidentia mala pessima et mortalia sicut est febris et tremor et denigratio coloris. Sed quidem accidit propter quia putrefactio illa fit in osse vel sicut super panniculos tegentes cerebrum qui continuatur cordi. Ad putrefactionem autem factam in osse vel [illegible] continuatur cordi consequitur febris, tremor et defectio coloris. propter notandum quod [illegible] ad cerebrum propter putrefactionem que sic autem facta est super panniculum tegentem cerebrum et per [illegible] accidunt quandoque accidentia mala pessima et mortalia de quibus fit hic mentio sicut appoplexia, spasmus et similia. etiam propter eo passionem factam ad stomachum accidit vomitus [illegible]. **Ex quo sequitur ut prohibeantur adventus istorum accidentium et necessarium ut findatur.** [illegible] et cutis denegatur fractura ossis ut possit fieri cura eius fracture ossis secundum modum de quo postea fit mentio et subdit postea auctor. **et multociens quidem significatur** [illegible] vult dicere auctor quod non solum significatur quod sit putrefactio in osse quando negligitur cura fracture ex accidentibus que consequuntur in processu de quibus facta est mentio verum etiam significatur fractura ossis multociens ex modo patientis quando tangit ipsum quando enim dicitur hic doleo sicut sentio lesionem. Ista enim sunt ex significationibus [illegible] fracture ossis. vel signis. medicus curet apostema factum in carne et cute non tamen cessat lesio cranei propter fracturam que remanet in osse et tunc necessarium est cum non valeat cura apostematis quod est in carne et cute ut reddeat [illegible] ad dispositionem suam. id est ut [illegible] reddeat ad dispositionem in qua debet esse ad hoc ut fractura sit detecta et manifesta et postea debet aliam secundum modum quam postea dicetur et ex hoc auctor aliud hic non vult nisi quod non sufficiat quando est fractura in osse occupare medicum ad curationem apostematis carnis et cutis exterioris ymo oportet procedere ad fracturam. Et si ignoret fracturam et fiat occupatio in cura illius tunc non fit cura ymo accidet error. et propter hoc ex dictis ipse infert necessario et [illegible] pregnosticare quod fractura non est detecta modum secundum quem cognoscatur ossis fractura. Istud vult dicere auctor ex his verbis. Deinde dicit. **et cum curetur fractura.** In ista parte auctor ostendit errorem qui accidit ex ignorantia fracture absconse propter occultationem eius. Et fissura non accidit cum in carne et cute et tunc fractura cranei. tunc ostendit errorem qui aliquando contingit in cura fracture solum sicut ex ignorantia fracture secundum suam totalitatem aliquando quod fractura ad sensum apparet secundum aliquam partem suam in medicus ergo putat aliquando quod sufficiat fissura illa que est in carne et cute. Et propter hoc non putat amplius esse fracturam in osse nisi illa que apparet ad sensum. tunc autem in hoc accidit error aliquando magnus. propter quia fissura non solum est in illa parte cranei que apparet ad sensum ymo est valde maior collata sub carne et cute. Sic quod tunc medicus non amplificat [illegible] ita ut detegatur fractura sufficienter et excedit. propter quia non perfecte potest mundus et sordes mundificari sive retinebitur et defluet ad meliorem [illegible] ossis et accidet putrefactio in osse super panniculum etiam tegentem cerebrum. et sic iste error differt a priori. Nam prior error provenit ex ignorantia fracture propter quod nullo modo apparet ad sensum cum non sit fissura carnis nec cutis. Sed iste error non accidit quia nullo modo fractura appareat in carne et cutis non sit fissura sed accidit quod fissura facta in carne et cute non est sufficiens ita ut sufficienter sit detecta fractura putat enim multociens medicus quod non sit amplior fractura nisi que apparet et sic putat sufficere illa fissura que est in carne et cute et tamen non sufficiat propter enim dictum sed oportet amplius incidere et

detegere. Istud est quod auctor dicit magis (?) [illegible] propter quod ad curationem fracture oportet ipsam detegere a carne et cute et ex hoc postea ostendit errorem qui aliquando contingit [illegible] **et ut curetur fractura oportet ut findatur carne** [illegible] vult dicere quod ut detegatur tota fractura oportet ut fractura tota et caro detegatur propter quod in tota quantitate ut libere possit mundus et sordes ad ipsum profluere et non retineri in ipsa et redditur cum ipsius cura. Deinde dicit. **oportet ut non retineatur virus.** hoc id est quia retentio virus est causa ut virus penetret et defluat ad interiora. hoc autem est causa putrefactionis ossis et panniculorum cerebri et aliorum accidentium malorum de quibus facta est prius mentio et de quibus etiam fit mentio subdit postea. **nisi finis postea securus de adventu apostematis. et inveneris apostema ruptum et appareat fractura una.** Circa quam partem notandum quod [illegible] exceptionem respectu ad id quod dicit auctor. dicit enim non oportet enim ut non retineatur virus sed in quolibet casu virus. quando in nullo remanet oportet virus sed in quolibet oportet ut ad ipsam defluat et manifestet sed respectu ad illud quod post non dicitur. et ut curetur fractura oportet ut findatur carne. vult est per hoc modo subditur non ostendere in quolibet casibus contingit quod in eis ad curationem fracture non est necessarium [illegible] detegere vel incisionem facere in carne et cute et duos casus ponit auctor in quibus non est necessarium incisionem facere. primum casum tangit cum dicit. Nisi sis securus de adventu apostematis secundum casum tangit cum dicit. et inveneris apostema ruptum.

Primus ergo casus quando auctor vult tangere est in quo debet fieri incisio carnis et cutis ad fracturam cranei nisi securus sis de adventu apostematis. id est nisi sis securus quod apostema non oriatur et erit in panniculis cerebri vel in ipso cerebro et per hoc etiam intelligere de quolibet alio accidente malo quod per hoc vult dicere auctor quando tu sis securus quod non accidit quodcumque accidens malum tunc potes absque incisione carnis et cutis procedere in curatione fracture. Quomodo autem fiet et quando contingit sic quod absque incisione carnis et cutis sit possibile curare fracturam absque aliquo accidente malo. [illegible] quod hoc est possibile aliquo duorum modorum. aut enim hoc est possibile quia illa fissura facta in craneo sic est parva quod non est intra [illegible] de aggregatione [illegible] partes ipsius cum penetrantem ossis ad medullam sicut dictum est supra. aut hoc est possibile cum modo curationis et dispositione scilicet natura ossis et dispositione vel [illegible] ex dispositione [illegible] quando enim [illegible] [illegible] est bonus [illegible] et non superfluorum ergo fractura ossis non sit magna vel nulla [illegible] et quod etiam fractura ossis potest dicere aliqua resperationem ad [illegible] et [illegible] in osse et fortis potest superflua [illegible] expellere et [illegible] medicina que apponitur sit adiuvativa salutaris ad curam quod aliquando absque incisione facta in carne et cute absque alia detectione ossis curetur fractura et per hunc modum [illegible] quod aliquando [illegible] curat [illegible] in quibus fractura cranei consolidatur absque incisione carnis et cutis et absque detectione et elevatione ossis et quia aliquando curatur propter quam aliquando accidit illa que dicta sunt contrarie credunt posse curare. Et quia omnia illa raro accidunt hic est quod in illo modo curationis non sic curat ymo egros multos fecit et de hoc autem videbitur adhuc plus in processu. Secundus autem casus quem vult tangere auctor in quo non est necessarium facere incisionem carnis et cutis est quando apostema factum in carne et cute est ruptum. ita quod sic est discooperta caro et cutis quod apparet fractura tota. Tunc est sic detecta ossis quod non est necessarium incisionem facere cutis et carnis. dico autem si appareat tota fractura in hoc aliquando accidit error. nam multociens apparet fractura una in osse. et est discooperta et putatur quod non sit amplior fractura in osse. et tamen aliquando sit alia fractura latens sub cute in alia parte ossis que si non discooperiretur fierent in nocumenta que dicta sunt. etiam multum est in [illegible] impossibile quod ex aliqua re [illegible] aliquando multe fracture in diversis partibus ossis quarum una sit discooperta. alia non occulta sub cute et tunc si discoopertio non fiat usque ad illa aggregatur virus in partes ossis et descendet in [illegible] sicut possibile et aggredietur nocumenta de quibus sermo est factus et hoc est quod vult dicere auctor. et inveneris apostema ruptum et appareat

eius. et primo ostendit modum curationis apostematis cum debetur
ipsi apostemati calido. Et regimine quod conuenit apostematibus
callidis. Tractatus in .2. nam primo ostendit modum curationis apost
tis cum declarat causa primitiua et manifesta. 2o ponit modum
curationis eius cum causa eius interiora et occulta est. Et si
est ex causa occulta. Et notandum circa hoc quod dupliciter
mor curationis in utroque non est nisi quantum ad remotionem cause
quod facit apostema sed alio quod debet apostema quod incipit esse in
membro. aut quod iam facta est quantum ad localia eadem est. Dicat

membri uirtutis aut alia ex causis quod prohibet ipsam fieri
ergo. propter autem maxime ad prohibendum causam occultam flo
botomia licet aliquid faciat in causa manifesta, sed fuerit
ergo ut plus est quod apostema accidit ex fluxu sanguinis ad
locum sed ex fluxu aliorum humorum. propter quod sanguis est magis
aptus fluere. tum etiam propter habundantiam ipsius maiorem
tum etiam propter mobilitatem ipsius. Iterum etiam flobotomia est cum q
magis distrahit hic autem in principio quia apostema magis sit inde
ex fluxu humoris oportet maiorem distractionem fieri ad partes opp
sitas. et quia sit maxime fiat flobotomia. et ideo etiam facit p
tatio plus inanitionem facit sed flobotomia sit de alio modo etiam
cuiuscumque. et minorationem cibi. in modo quod cibi est
curans. et fiat dieta tenuis. aut si uictus tolleret fiat in ultro
ut fiat dieta tenuis. talis enim motus diete conuenit apostemati calido paruuli
et sic egritudo acuta. Et regimine quod conuenit apostema
tibus. sunt. debet administrari in tali apostemate. sed autem
cognoscere incipit autem quantum ad modum curationis qui debetur
pro localia que sunt apostemati calido. Et iste quod motus cu
rationis est ut in principio administrentur ea quae habent uirtutem infrigida
tiua. et repercussiua quale est oleum rosarum ut prius dictum
est in processu. aut quando humor incipit fingi in apostemate
debet administrari ea que dicunt habent actualem resolutiuam
et sint mollificatiua et sedatiua doloris qualia sunt illa
que autem pone in textu sicut est embrocatio facta cum aqua

Embrocatio

in qua decocta sunt altea. et fenugrecum. et semen lini et

stratur circa partes capitis. necnon etiam circa totum fiat
et balneare infirmum in aqua calida et inungere ipsum
cum aliquo calido ut utitur mollificatiuum et resolutiuum habente
in auribus autem distillari debet aliquid ex oleis quod calidi
tate, et ebullitionem sedant in humoribus sicut est oleum ro.
et uiolarum et oleum nenufarum et similia. Ista
enim posita in auribus sedant inflammationem

humoris contentorum sub cerebro et subdit autem. quod si apostema
calidum perseuerat. et non est aliquod similiter medicam

solutiuum. In quibus uerbis autem insinuat 2a. unum est de
tempore administrationis medicine et illud tangit cum dicit primo
quod si apostema calidum perseuerat in sed enim inuit quando solutum
est conueniens materie precedente apostemate et id est tempus in processu
eo autem quia eius concoctio plus est in processu sic concoctio
flobotomie plus est in principio. aut euacuatio quam magis decet huo
rem ad partem contrariam ut non moueatur et figatur in loco
nunc autem tunc cum farmaco quia farmacum erat eligenda
est ideo quia maiorem euacuat humorem. sed tunc cum flobotomia quia
eligendo non curat. ipsa est ideo in qua maiore fit distractio
omnium humorum qui sunt in motu ad partem aliquam propter quod
concoctio flobotomie maiore est in principio in quo causat per rationem
plus distractio et humoris diuisio sed aliud competentia
aut farmacum plus apostemate precedente quia tunc propter curationem
quantum exsiccando humoris que in apostemate inbibuntur est contius
In 2o autem insinuat tiores usus curationis cum fluxu. et hec
insinuat cum dicat et non est aliquod impediens similiter medicam
solutiuum. In hoc enim quod sic dicit insinuat quod plus ipsa
sunt que prohibent puluis eius quod usum flobotomie et ideo sic
[illegible]
florum facit in et similibus casibus quam farmacum tollere
In farmaco enim colligatione et timore propter quod non possumus
de nobis restringere motum eius sicut infra motum in
curationis flobotomie propter quod tunc est in usu eius et flobotomia
[illegible] non sic [illegible] curationis eius. sic est
impediens curationis flobotomie. propter quod tunc est magis in usu eius et
pape in passionibus acutis est quibus necessarius est et est etiam flobotomia
plus in febre continue propter commotionem factam in humoribus
et inflammationes que fiunt in eis quam non sic sit faciente flobotomia
et quia illa maiore autem in primis acutis et propter in
illis quam sunt cum apostemate aliquid inbibi. Hic est quod plus timemus
ipsam facere in eis quam usum flobotomie. 3o autem insinuat cum
dicit. soluens semel. In hoc enim uerbo noluit insinuare
quod farmacum illud quod exhibet debet esse farmacum solutiuum cum facilitate.
ut ex usu facilitas non augeat inflationem et furiam
